Applica Incorporated and Subsidiaries
Notes to Consolidated Financial Statements

1. SUMMARY OF ACCOUNTING POLICIES

Interim Reporting

The accompanying unaudited consolidated financial statements include the accounts of Applica Incorporated and its subsidiaries (Applica). All significant intercompany transactions and balances have been eliminated. The unaudited consolidated financial statements have been prepared in conformity with Rule 10-01 of Regulation S-X of the Securities and Exchange Commission and, therefore, do not include information or footnotes necessary for a complete presentation of financial position, results of operations and cash flows in conformity with accounting principles generally accepted in the United States of America. However, all adjustments (consisting of normal recurring accruals) that, in the opinion of management, are necessary for a fair presentation of the financial statements, have been included. Operating results for the three and nine months ended September 30, 2005 are not necessarily indicative of the results that may be expected for the fourth quarter or the full year ending December 31, 2005 due to seasonal fluctuations in Applica s business, changes in economic conditions and other factors. For further information, please refer to the Consolidated Financial Statements and Notes thereto contained in Applica s Annual Report on Form 10-K for the year ended December 31, 2004.

Reclassifications

Certain prior period amounts have been reclassified for comparability.

Cooperative Advertising and Slotting Fees

Effective January 1, 2005, Applica modified its accounting treatment for cooperative advertising and slotting fees provided to its customers. The modification was necessary because Applica is no longer using an unrelated third party to verify performance and determine the fair value of the benefits Applica receives in exchange for the payment of promotional funds. In accordance with Emerging Issues Task Force (EITF) 01-9, Accounting for Consideration Given By a Vendor To a Customer (Including a Reseller of the Vendor s Products) , which addresses the income statement classification of slotting fees and cooperative advertising arrangements with trade customers, these promotional funds should be accounted for as a reduction of selling price and netted against sales. Prior to January 1, 2005, Applica classified promotional funds as selling, general and administrative expenses in its consolidated statement of operations. This modification reduced each of net sales, gross profit and selling, general and administrative expenses by (a) $4.1 million for the three months ended September 30, 2005, (b) $4.8 million for the three months ended September 30, 2004, (c) $9.9 million for the nine months ended September 30, 2005, and (d) $13.1 million for the nine months ending September 30, 2004. Because the modification resulted solely in a reclassification within the consolidated statement of operations, there was no impact on Applica s financial condition, operating income or net earnings for any of the periods presented.

Inventories

Inventories are stated at the lower of cost or market. Cost is determined by the first-in, first-out method. Inventories were comprised of the following:

	September 30, 2005	December 31, 2004
	(In thousands)	
Raw materials	$ 1,752	$ 4,528
Work in process	282	280
Finished goods	139,129	126,695
	$ 141,163	$ 131,503

Table of Contents

Applica Incorporated
Notes to Consolidated Financial Statements Continued

Stock Based Compensation

At September 30, 2005, Applica had four active stock based compensation plans. Applica accounts for stock-based compensation using the intrinsic value method. Accordingly, compensation expense for stock options issued is measured as the excess, if any, of the fair value of Applica s common stock at the date of grant over the exercise price of the options. Applica s net earnings (loss) and earnings (loss) per share would have been the pro forma amounts indicated below had compensation expense for the stock option plans and non-qualified options issued to employees been determined based on the fair value of the options at the grant dates consistent with the provisions of Statement of Financial Accounting Standards (SFAS) No. 123, Accounting for Stock-Based Compensation.

	For the three months ended		For the nine months ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004
	(In thousands, except per share data)			
Net loss, as reported	(8,179)	$ (9,943)	$ (49,636)	$ (138,240)
Add: Stock-based employee compensation expense included in net loss		113		113
Deduct: Total stock-based employee compensation expense determined under fair value based method	(208)	(295)	(2,205)	(672)
Pro forma net loss	$ (8,387)	$ (10,125)	$ (51,841)	$ (138,799)
Loss per share:				
Basic and diluted as reported	$ (0.34)	$ (0.41)	$ (2.06)	$ (5.78)
Basic and diluted pro forma	$ (0.35)	$ (0.42)	$ (2.15)	$ (5.80)

No tax benefits were attributed to the stock-based employee compensation expense during the periods presented above because valuation allowances were required on substantially all of Applica s deferred tax assets.

The above pro forma disclosures may not be representative of the effects on reported net earnings (loss) for future periods as options vest over several years and Applica may continue to grant options to employees.

On June 16, 2005, the Compensation Committee of the Board of Directors approved the acceleration of vesting of all unvested out-of-the-money stock options awarded to employees under Applica s stock option plans, except for those options held by executive officers. All stock options with exercise prices equal to or greater than $3.28 per share, the closing price of Applica s common stock on June 16, 2005, were considered to be out-of-the-money. No stock options held by non-employees, including directors, were subject to acceleration. Options to purchase approximately 425,000 shares of common stock were subject to the acceleration. The options have a range of exercise prices of $3.63 to $11.16 and a weighted average exercise price of $4.91.

Because the options that were accelerated have exercise prices in excess of the current market value of the common stock and, therefore, were not fully achieving their original objectives of incentive compensation and employee retention, the Compensation Committee believed that the acceleration would have a positive effect on employee morale and retention. Additionally, the acceleration enabled Applica to reduce compensation expense associated with stock options upon the adoption of SFAS No. 123 (revised 2004), *Share-Based Payment* (SFAS 123R), on January 1, 2006. The aggregate pre-tax expense associated with the accelerated options that would have been reflected in Applica s consolidated statement of operations in future fiscal years was approximately $1.2 million. This amount is

reflected in the pro forma footnote disclosure above for the nine months ended September 30, 2005.

In accordance with the requirements of SFAS 123, the fair value of each option grant was estimated on the date of grant using the Black-Scholes option-pricing model with the following weighted-average assumptions:

Recent Accounting Pronouncements

In December 2004, the Financial Accounting Standards Board (FASB) issued SFAS 123R. SFAS 123R is a revision of SFAS No. 123, *Accounting for Stock-Based Compensation* , and supersedes Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* (APB No. 25), and its related implementation guidance. SFAS 123R establishes standards for the accounting for transactions in which a company exchanges its equity instruments for goods or services. It also addresses transactions in which a company incurs liabilities in exchange for goods or services that are based on the fair value of the company s equity instruments or that may be settled by the issuance of those equity instruments. SFAS 123R requires public companies to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award (with limited exceptions). That cost must be recognized over the period during which an employee is required to provide services in exchange for the award (which is usually the vesting period of the award).

SFAS 123R was originally scheduled to be effective as of the beginning of the first interim or annual reporting period that begins after June 15, 2005. In April 2005, the SEC announced the adoption of a new rule amending the compliance date to the beginning of the first annual reporting period that begins after June 15, 2005. Therefore, SFAS 123R will be effective for Applica in the next fiscal year beginning January 1, 2006. As of the required effective date, public companies will apply SFAS 123R using a modified version of the prospective transition method. Under that transition method, compensation cost will be recognized on or after the required effective date for the portion of outstanding awards for which the requisite service has not yet been rendered, based on the grant-date fair value of those awards calculated under SFAS 123 for either recognition or pro forma disclosures.

The effects of the adoption of SFAS No. 123R on Applica s financial condition, results of operations and cash flows are dependent upon a number of factors, including the number of employee stock options outstanding and unvested, the number of employee options that may be granted in the future, the future market value and volatility of Applica s

stock price, movements in the risk-free rate of interest, stock option exercise and forfeiture patterns, and the stock option valuation model used to estimate the fair value of each option. As a result of these variables, it is not yet possible to reliably estimate the effect of the adoption of SFAS No. 123R will have on Applica s financial condition, results of operations or cash flows; however, Applica expects that the effect of the adoption of SFAS 123R related to the unvested stock options at September 30, 2005 will result in approximately $0.6 million of compensation expense, which will be reflected in the consolidated statements of operations in 2006.

2. SHAREHOLDERS EQUITY

The following table shows weighted average basic shares for the respective periods:

	For the three months ended		For the nine months ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004
Weighted average basic shares	24,163,766	24,068,730	24,146,599	23,935,837

The following table shows potential common stock equivalents outstanding to purchase shares of common stock that were excluded in the computation of diluted loss per share. All common stock equivalents have been excluded from the diluted per share calculations in the three-month and nine-month periods ended September 30, 2005 and 2004 because their inclusion would have been anti-dilutive.

	For the three months ended		For the nine months ended	
	September 30, 2005	September 30, 2004	September 30, 2005	September 30, 2004
Number of shares	2,701,405	2,185,718	2,542,096	2,138,567
Range of exercise price	$2.53 $31.69	$ 3.63 $31.69	$2.53 $31.69	$ 3.63 $31.69

3. COMMITMENTS AND CONTINGENCIES

Litigation and Other Matters

Applica is subject to legal proceedings, product liability claims and other claims that arise in the ordinary course of its business. In the opinion of management, the amount of ultimate liability with respect to such matters, if any, in excess of applicable insurance coverage, is not likely to have a material effect on Applica s business, financial condition, results of operations or liquidity. However, as the outcome of litigation or other claims is difficult to predict, significant changes in the estimated exposures could occur.

As a distributor of consumer products, Applica is also subject to the Consumer Products Safety Act, which empowers the Consumer Products Safety Commission (CPSC) to exclude from the market products that are found to be unsafe or hazardous. Applica receives inquiries from the CPSC in the ordinary course of its business. In the opinion of management, the amount of ultimate liability with respect to such matters, if any, is not likely to have a material effect on Applica s business, financial condition, results of operations or liquidity. However, under certain circumstances, the CPSC could require Applica to repurchase or recall one or more of its products.

Employment and Other Agreements

In the second quarter of 2005, Applica entered into new employment agreements with three of its executive officers. Additionally, in 2004, Applica entered into a new employment agreement with its President and Chief Executive Officer. These contracts have terms ranging from two to three years. Additionally, such agreements provide the executives with the right to receive lump sum payments of up to 30 months compensation if their employment is terminated after a change in control of Applica, as defined in such agreements.

Michael J. Michienzi has elected to resign his position as President Household Products Division of Applica Consumer Products, Inc. effective December 30, 2005, at which time his employment agreement will terminate.

4. COST OF SALES

Cost of Goods Sold

Included in cost of goods sold for the nine months ended September 30, 2005 were inventory write-downs of approximately $12.8 million primarily related to lower-than-anticipated consumer demand for two products. There were no

Table of Contents

Applica Incorporated
Notes to Consolidated Financial Statements Continued

write-downs recorded for the aforementioned two products for the three months ended September 30, 2005 The inventory write-downs related to the Household Products reportable segment.

Restructuring Charges

For the three months ended September 30, 2005, Applica incurred a total of $4.7 million of restructuring charges associated with the downsizing and closure of the manufacturing facility in Mexico. These charges consisted of the following:

$1.1 million write-down of property, plant and equipment;

$1.4 million related to the acceleration of the depreciation of the machinery and equipment used in the manufacturing process; and

$2.2 million in severance charges.

For the nine months ended September 30, 2005, Applica incurred a total of $9.9 million of restructuring charges associated with the continued downsizing and closure of the manufacturing operations in Mexico. These charges consisted of the following:

The write-down of $3.3 million of raw materials inventory that will no longer be used in production;

$1.1 million write-down of property, plant and equipment;

$2.7 million related to the acceleration of the depreciation of the machinery and equipment used in the manufacturing process; and

$2.8 million in severance charges.

For the three months ended September 30, 2004, there were no restructuring charges. For the nine months ended September 30, 2004, Applica incurred restructuring charges of $0.9 million primarily related to the downsizing of its Hong Kong-based manufacturing facilities, which were sold in July 2004.

All restructuring charges related to the Manufacturing reportable segment.

5. ASSETS HELD FOR SALE

In July 2005, Applica decided to close its manufacturing facility in Mexico. The manufacturing operations ceased production in October 2005. In October 2005, Applica received an initial indication of interest from an unrelated third party to purchase the land and building housing its factory in Mexico for approximately $5.5 million. The land and building were classified as held for sale and included in prepaid expenses and other in the accompanying consolidated balance sheet and was approximately $5.3 million as of September 30, 2005.

All assets held for sale relate to the Manufacturing reportable segment.

6. PROPERTY, PLANT AND EQUIPMENT

The following is a summary of property, plant and equipment:

	Useful Lives	September 30, 2005	December 31, 2004
		(In thousands)

11

Applica Incorporated
Notes to Consolidated Financial Statements Continued

On March 30, 2005, Applica completed the implementation of a significant upgrade of its information technology infrastructure, including the installation of a new enterprise resource planning (ERP) system. As a result, during the second quarter of 2005, approximately $12.1 million of capitalized expenditures associated with the information technology upgrade, which were previously not subject to depreciation, were placed into service and began to be depreciated over their respective useful lives.

7. RESTRUCTURING AND OTHER CHARGES

For the nine months ended September 30, 2005, the activity relating to the accrued restructuring and other charges was as follows:

	Amount Accrued at December 31, 2004	2005 Payments	Amount Accrued at September 30, 2005
		(In thousands)	
Back-office consolidation	$ 2,536	$ (1,405)	$ 1,131

The amounts accrued in connection with the restructuring and other charges were reflected in accrued expenses in the accompanying consolidated balance sheets.

8. PRODUCT WARRANTY OBLIGATIONS

Estimated future warranty obligations related to certain products are provided by charges to operations in the period in which the related revenue is recognized. Accrued product warranties as of September 30, 2005 and 2004 were as follows:

	September 30, 2005	September 30, 2004
	(In thousands)	
Balance, beginning of period	$ 7,183	$ 6,084
Additions to accrued product warranties	25,051	17,932
Reductions of accruals payments and credits issued	(26,912)	(20,401)
Balance, end of period	$ 5,322	$ 3,615

9. SHORT-TERM DEBT

Applica has a senior revolving credit facility with a syndicate of banks that provides for borrowings on a revolving basis of up to $175 million with a $10 million sublimit for letters of credit. The credit facility matures in November 2009. Advances under the credit facility are governed by Applica s collateral value, which is based upon percentages of eligible accounts receivable and inventories.

In June 2005, Applica amended its senior credit facility to provide a temporary increase in liquidity from July through November 2005. Pursuant to the amended facility, from July 1, 2005 through November 30, 2005, Applica is required to maintain minimum average monthly availability of $20 million and a daily availability block of $15 million. If Applica fails to maintain the minimum average monthly availability, then Applica must meet certain monthly EBITDA minimums. Beginning on December 1, 2005 and through the remaining term of the credit facility, Applica will be required to maintain minimum average monthly availability of $28 million and a daily availability

block of $20 million.

As of September 30, 2005, Applica was borrowing approximately $89.4 million under the facility and had approximately $40.5 million available for future cash borrowings. There were $1.7 million in letters of credit outstanding under the credit facility as of September 30, 2005.

At Applica s option, interest accrues on the loans made under the credit facility at either:

LIBOR (adjusted for any reserves), plus a specified margin (pursuant to the amended credit facility set at 2.50% through November 30, 2005), which was 6.36% at September 30, 2005; or

---

Table of Contents

Applica Incorporated
Notes to Consolidated Financial Statements Continued

the Base Rate (which is Bank of America s prime rate), plus a specified margin (pursuant to the amended credit facility set at 0.50% through November 30, 2005), which was 7.25% at September 30, 2005.

Swing loans up to $15.0 million bear interest at the Base Rate plus a specified margin (pursuant to the amended credit facility set at 0.50% through November 30, 2005), which was 7.25% at September 30, 2005.

The credit facility contains a number of significant covenants that, among other things, restrict the ability of Applica to dispose of assets, incur additional indebtedness, prepay other indebtedness, pay dividends, repurchase or redeem capital stock, enter into certain investments or create new subsidiaries, enter into sale and lease-back transactions, make certain acquisitions, engage in mergers or consolidations, create liens, or engage in certain transactions with affiliates, and that otherwise restrict corporate and business activities. As of September 30, 2005, Applica was in compliance with all covenants under the credit facility.

Although the credit facility expires in November 2009, Applica has classified the borrowings thereunder as a current liability in accordance with Emerging Issues Task Force (EITF) 95-22 Balance Sheet Classifications of Borrowings Outstanding under Revolving Credit Agreements That Include Both a Subjective Acceleration Clause and a Lock-Box Arrangement.

10. INTEREST AND OTHER INCOME

In July 2003, ZonePerfect Nutrition Company, an investment held by a partnership that was 50% owned by Applica, was sold for approximately $160.0 million. A portion of the proceeds from the sale of ZonePerfect was being held in escrow as of December 31, 2004, $8.4 million of which was owed to Applica. Half of this amount ($4.2 million) was recorded as part of the equity in net earnings of joint ventures in 2003. At December 31, 2004, Applica had not collected any portion of the escrowed funds and had included the $4.2 million in other receivables. Management believed that the collection of the remaining $4.2 million was uncertain and, therefore, such amount was not recorded into income as of December 31, 2004.

In February 2005, Applica received approximately $1.6 million in the first distribution of the funds held in escrow. In August 2005, Applica received approximately $3.4 million in the second distribution of the escrowed funds. Applica applied these receipts, totaling $5.0 million, to the receivable balance at December 31, 2004 of $4.2 million and recorded income of $0.8 million in the three month period ended September 30, 2005. If and when the claims made on the remaining escrowed funds are resolved in its favor, Applica could receive cash and record additional other income of up to $3.4 million, although it is likely that the claims will be settled for less.

11. BUSINESS SEGMENTS

At September 30, 2005, Applica managed its operations through three business segments: Household Products, Professional Personal Care Products and Manufacturing. The Manufacturing segment ceased operations in October 2005.

The segment information for the three months ended September 30, 2005 and 2004 and the nine months ended September 30, 2005 and 2004 was as follows:

	Household Products	Professional Personal Care Products	Manufacturing	Total
		(In thousands)		
Three Months Ended September 30, 2005:				
Net sales	$ 121,758	$ 13,756	$ 14,351	$ 149,865
Inter-segment sales	296		9,932	10,228
Operating (loss) earnings	1,387	623	(5,318)	(3,308)
Depreciation and amortization	297		2,135	2,432

12. CONDENSED CONSOLIDATING FINANCIAL INFORMATION

Applica s domestic subsidiaries are guarantors of Applica s 10% Senior Subordinated Notes due 2008. The following condensed consolidating financial information presents the financial position, results of operations and cash flows of Applica Incorporated (on a stand alone basis), the guarantor subsidiaries (on a combined basis), the non-guarantor subsidiaries (on a combined basis) and the eliminations necessary to arrive at the consolidated results of Applica. The results of operations and cash flows presented below assume that the guarantor subsidiaries were in place for all periods presented. Applica and guarantor subsidiaries have accounted for investments in their respective subsidiaries on an unconsolidated basis using the equity method of accounting. The guarantor subsidiaries are wholly owned subsidiaries of Applica and have fully and unconditionally guaranteed the notes on a joint and several basis. The notes contain certain covenants which, among other things, restrict the ability of the guarantor subsidiaries to make distributions to Applica Incorporated. Applica has not presented separate financial statements and other disclosures concerning the guarantor subsidiaries and non-guarantor subsidiaries because it has determined they would not be material to investors.

13. SUBSEQUENT EVENTS

Term Loan

In October 2005, Applica entered into a secured term loan agreement with Mast Credit Opportunities I, (Master) Ltd. to borrow $20 million. The term loan is secured by a lien on Applica s assets, which is subordinate to Applica s senior revolving credit facility. Applica used the proceeds from the term loan to repurchase from Mast $5.0 million of its 10% senior subordinated notes due 2008 at 98% of par value. The balance of the proceeds was used to pay down its senior revolving credit facility. As reported in a Schedule 13G filed with the SEC on August 29, 2005, Mast owns approximately 5.8% of the outstanding common stock of Applica.

The term loan bears interest at the three-month LIBOR rate plus 625 basis points, which was 10.51% at November 2, 2004. The term loan matures in November 2009 and requires no principal payments until such time. In connection with the repayment of the term loan, after June 30, 2006 Applica is required to pay an exit fee that increases on a periodic basis from 1% to 4% of the principal amount of the loan. Applica incurred fees of approximately $0.2 million in connection with the term loan.

Additionally, in October 2005, Applica entered into a Second Amendment to Amended and Restated Credit Agreement with the lenders under its senior revolving credit facility, which authorized the term loan transaction with Mast. In consideration of such amendment, Applica paid its bank group a fee of $50,000.

Income Tax Audit

In October 2005, Applica was notified that Applica Canada Corporation, Applica s Canadian operating subsidiary, was selected for an income tax audit for the 2003 and 2004 fiscal years by the Canada Customs and Revenue Agency. Management believes that adequate provision for taxes has been made for the years under examination.

Supply Agreement

In June 2004, Applica entered into a long-term supply agreement with Elec-Tech International (H.K.) Company, Ltd. The supply agreement provided a right of first refusal with respect to manufacturing or purchasing products, as applicable, for each party. Applica maintained the flexibility to purchase products from its affiliate and from third parties in a number of circumstances, including Elec-Tech s inability to meet Applica s price, quality and delivery criteria. The agreement also provided indemnification to Applica for product liability claims and recalls related to products purchased from Elec-Tech.

Table of Contents

Elec-Tech accounted for approximately 29% of Applica s total purchases in the nine month period ended September 30, 2005 and approximately 14% of Applica s total purchases in 2004.

At September 30, 2005, accounts receivable of $2.3 million from Elec-Tech and accounts payable of $26.1 million due to Elec-Tech were presented net and were included in accounts payable in the accompanying consolidated balance sheet. At December 31, 2004, accounts receivable of $9.1 million from Elec-Tech and accounts payable of $10.8 million due to Elec-Tech were presented net and were included in accounts payable in the accompanying consolidated balance sheet.

In November 2005, Applica notified Elec-Tech of its intent to terminate the supply agreement as the result of material breaches by Elec-Tech. Pursuant to the terms of the agreement, Elec-Tech has 30 days to cure the breaches. If Elec-Tech fails to cure such breaches, the supply agreement will terminate on December 3, 2005. Management and representatives of Elec-Tech have met on several occasions to discuss these and other matters and to negotiate the terms of future business between the parties, although at this time a final agreement has not been reached.

Applica intends to continue to purchase products from Elec-Tech, as long as Elec-Tech can meet Applica s price, quality and delivery criteria, and Elec-Tech continues to produce and ship products to Applica. Although Elec-Tech is expected to remain a significant supplier, Applica anticipates the amount of products it purchases from Elec-Tech will decrease in 2006. Because Applica has several sources of product supply and due to the seasonality of the household appliance business, management does not believe that this matter will have a material impact in the fourth quarter.

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

As used in this Quarterly Report on Form 10-Q, we, our, us, the Company and Applica refer to Applica Incorporated and its subsidiaries, unless the context otherwise requires.

The following discussion and analysis and the related financial data present a review of the consolidated operating results and financial condition of Applica for the three-month and nine-month periods ended September 30, 2005 and 2004. This discussion and analysis should be read in conjunction with the Consolidated Financial Statements and Notes thereto contained in Applica s Annual Report on Form 10-K for the year ended December 31, 2004.

General

Applica is a marketer and distributor of a broad range of branded small household appliances. Applica markets and distributes kitchen products, home products, pest control products, pet care products and personal care products. Applica markets products under licensed brand names, such as Black & Decker®, and its own brand names, such as Windmere®, LitterMaid®, Belson® and Applica®. Applica s customers include mass merchandisers, specialty retailers and appliance distributors primarily in North America, Latin America and the Caribbean.

As of September 30, 2005, Applica managed its operations through three business segments: Household Products, Professional Personal Care Products and Manufacturing. The Manufacturing segment ceased operations in October 2005.

The small household appliance sector of the consumer goods industry is a mature industry characterized by intense competition based on price, quality, retail shelf space, product design, trade names, new product introduction, marketing and distribution approaches. Chinese manufacturers have emerged over the last few years as low cost, high quality competitors resulting in increased outsourcing by U.S. suppliers and even some retailers. Additionally, retailer consolidation has resulted in a significant power shift from suppliers and supplier consolidation has resulted in large companies with brand depth and breadth that provide a significant competitive advantage. Applica primarily competes with both domestic and international distributors and manufacturers primarily at mid-tier price points.

We continuously have to balance the cost of our products, without compromising quality, with the price constraints from our customers. The prices of raw materials such as copper, steel and plastics have significantly increased in recent years and are expected to remain high in the foreseeable future. This has negatively impacted our gross margins by increasing the price we pay for our products, which in many circumstances we have been unable to pass on to our customers. This is expected to continue to negatively impact our margins during the remainder of 2005 and into 2006.

Retailer consolidation, industry consolidation and high raw materials prices have eroded our profitability. We have been focused on making changes to our business model in order to combat these margin pressures. Measures we have taken so far include:

- the downsizing and ultimate sale of our Hong Kong-based manufacturing operations;
- the downsizing and closure of our manufacturing operations in Mexico;
- the establishment of strategic sourcing partners; and
- customer and product rationalization initiatives

We also continue to focus on innovative products with proprietary technologies, design and higher margins. Additionally, we continuously evaluate ways to improve the products in our core business by adding features or changing the designs to appeal to consumers. As part of our focus on new product introductions and brand development, we search for other growth opportunities within and beyond our existing businesses. We believe that the markets and industry in which we compete may provide growth opportunities through strategic acquisitions or mergers. We review these prospects for strategic transactions as they become available.

Close of Mexican Manufacturing Facility

In recent years, we have been rationalizing our Mexican manufacturing operations. In 2004 and the first quarter of 2005, we shifted a significant amount of production from Mexico to third parties in China and began to reduce our Mexican manufacturing capacity to reflect only the volume needed for the Mexican marketplace. In July 2005, the decision was made to close our manufacturing operations in Mexico. The production ceased in October 2005. The decision resulted primarily from competitive pressures from Chinese manufacturers. Manufacturers in China are now able to provide good quality and well-designed products at a cost that is lower than our cost to produce a similar product in Mexico.

With the closure of the Mexican facility, we will outsource the manufacturing of all of our products to third party suppliers located primarily in the Far East. This will allow us to concentrate our efforts on marketing, distribution and sourcing of our products. We expect to see the benefits of this decision in 2006 as we continue to work with our suppliers to obtain the lowest possible product cost without compromising quality. We do not expect to fully realize gross margin improvements from moving production to the Far East until all of the remaining products manufactured by our Mexican facility are sold through.

In connection with the decision to close the Mexican manufacturing facility, we recorded a total of $4.7 million in restructuring charges for the three months ended September 30, 2005. These charges consisted of the following:

- $1.1 million write-down of property, plant and equipment;
- $1.4 million related to the acceleration of the depreciation of the machinery and equipment used in the manufacturing process; and
- $2.2 million in severance charges.

For the nine months ended September 30, 2005, we incurred a total of $9.9 million of restructuring charges associated with the downsizing and closure of the manufacturing operations in Mexico. These charges consisted of the following:

- write-off of $3.3 million of raw materials inventory that will no longer be used in production;
- $1.1 million write-down of property, plant and equipment;
- $2.7 million related to the acceleration of the depreciation of the machinery and equipment used in the manufacturing process; and
- $2.8 million in severance charges.

We expect to incur additional restructuring expenses of approximately $2.1 million in the fourth quarter of 2005, consisting of approximately $0.5 million in accelerated depreciation of machinery and equipment and net cash severance of approximately $1.6 million.

All restructuring charges relate to the Manufacturing reportable segment.

We intend to auction all of the machinery and equipment that was used in the production process in Mexico in December 2005 and expect to realize net cash proceeds of approximately $3.0 million. We also expect to sell the land and building housing our factory in Mexico in early 2006. The land and building were classified as held for sale and included in prepaid expenses and other in the accompanying consolidated balance sheets and was approximately $5.3 million as of September 30, 2005.

Supply Agreement

In June 2004, Applica entered into a long-term supply agreement with Elec-Tech International (H.K.) Company, Ltd. The supply agreement provided a right of first refusal with respect to manufacturing or purchasing products, as applicable, for each party. Applica maintained the flexibility to purchase products from its affiliate and from third parties in a number of circumstances, including Elec-Tech s inability to meet Applica s price, quality and delivery criteria. The agreement also provided indemnification to Applica for product liability claims and recalls related to products purchased from Elec-Tech.

Table of Contents

Elec-Tech accounted for approximately 29% of Applica s total purchases in the nine month period ended September 30, 2005 and approximately 14% of Applica s total purchases in 2004.

At September 30, 2005, accounts receivable of $2.3 million from Elec-Tech and accounts payable of $26.1 million due to Elec-Tech were presented net and were included in accounts payable in the accompanying consolidated balance sheet. At December 31, 2004, accounts receivable of $9.1 million from Elec-Tech and accounts payable of $10.8 million due to Elec-Tech were presented net and were included in accounts payable in the accompanying consolidated balance sheet.

In November 2005, Applica notified Elec-Tech of its intent to terminate the supply agreement as the result of material breaches by Elec-Tech. Pursuant to the terms of the agreement, Elec-Tech has 30 days to cure the breaches. If Elec-Tech fails to cure such breaches, the supply agreement will terminate on December 3, 2005. Management and representatives of Elec-Tech have met on several occasions to discuss these and other matters and to negotiate the terms of future business between the parties, although at this time a final agreement has not been reached.

Applica intends to continue to purchase products from Elec-Tech, as long as Elec-Tech can meet Applica s price, quality and delivery criteria, and Elec-Tech continues to produce and ship products to Applica. Although Elec-Tech is expected to remain a significant supplier, Applica anticipates the amount of products it purchases from Elec-Tech will decrease in 2006. Because Applica has several sources of product supply and due to the seasonality of the household appliance business, management does not believe that this matter will have a material impact in the fourth quarter.

Recent Hurricanes

Our operations were not materially impacted by the hurricanes that hit South Florida during the past few months. Although Hurricane Wilma shut down our executive offices in Miramar, Florida for a week, we were able to continue to accept orders, invoice and collect from customers and pay our vendors without significant interruption, although shipments of many of our orders were delayed a few days. Our disaster recovery and business continuation processes were adequate.

Alvarez & Marsal

Applica has recently retained Alvarez & Marsal, LLC, a global professional services firm specializing in turnaround management, to work with the Board of Directors and management team to evaluate the business plan for growth opportunities and cost reductions and to review the organizational structure.

Fluctuation of Chinese Currency

In 1994, China pegged the renminbi (also called the yuan) at an exchange rate of 8.28 to the U.S. dollar. U.S. groups have argued that the peg makes China s exports to the U.S. cheaper, and U.S. exports to China more expensive, thus greatly contributing to China s trade surplus with the U.S. In July 2005, China ended its peg to the dollar and let the renminbi fluctuate versus a basket of currencies. Immediately, the new renminbi rate revalued the currency by 2.1% to 8.11 to the dollar and at November 2, 2005 was at 8.09 to the dollar. We expect that the rate will remain relatively constant for the foreseeable future. Because a substantial number of our products are imported from China, the floating currency could result in significant fluctuations in our product costs and could have a material effect on our business.

Forward Looking Statement Disclosure

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act and Section 21E of the Exchange Act. Such statements are indicated by words or phrases such as anticipates, projects, management believes, Applica believes, intends, expects, and similar words or phrases. forward-looking statements are subject to certain risks, uncertainties or assumptions and may be affected by certain other factors, including the specific factors set forth below.

You should carefully consider the following risk factors, together with the other information contained in our annual report on Form 10-K for the year ended December 31, 2004, in evaluating us and our business before making an investment decision regarding our securities:

We purchase a large number of products from one supplier. Production-related risks with this supplier could jeopardize our ability to realize anticipated sales and profits.

We depend on third party suppliers for the manufacturing of all of our products which subjects us to additional risks.

Increases in costs of raw materials, such as plastics, steel, aluminum and copper, could result in increases in the costs of our products, which will reduce our profitability.

Our debt agreements contain covenants that restrict our ability to take certain actions. We could face liquidity and working capital constraints should we violate any of these covenants and we may not be able to obtain necessary refinancing on commercially reasonable terms or at all.

Our business could be adversely affected by retailer inventory management.

We depend on purchases from several large customers and any significant decline in these purchases or pressure from these customers to reduce prices could have a negative effect on our business.

Our business could be adversely affected by currency fluctuations in our international operations, particularly in light of the decision of the Chinese government to de-peg the value of the renminbi to the U.S. dollar.

Our future success requires us to develop new and innovative products on a consistent basis in order to increase revenues and we may not be able to do so.

Our business can be adversely affected by lower-than-anticipated customer or consumer demand for the products we develop and introduce in the marketplace.

Our business is very sensitive to the strength of the U.S. retail market and weakness in this market could adversely affect our business.

We compete with other large companies, as well as certain of our customers, that produce similar products.

Our business involves the potential for product recalls and product liability claims against us.

The bankruptcy or financial difficulty of any major customer or fluctuations in the financial condition of the retail industry could adversely affect our business.

If we are unable to renew the Black & Decker® trademark license agreement, our business could be adversely affected.

Our business could be adversely affected by changes in trade relations with China.

Our operating results are affected by seasonality.

Our business can be adversely affected by the loss of key personnel.

Our ability to generate accurate financial information on a timely basis could be adversely affected by unforeseen complications resulting from our newly implemented ERP system.

Government regulations could adversely impact our operations.

Should one or more of these risks, uncertainties or other factors materialize, or should underlying assumptions prove incorrect, actual results, performance, or achievements of Applica may vary materially from any future results, performance or achievements expressed or implied by the forward-looking statements. All subsequent written and oral forward-looking statements attributable to Applica or persons acting on our behalf are expressly qualified in their entirety by the cautionary statements in this paragraph. You are cautioned not to place

undue reliance on forward-looking statements. Applica undertakes no obligation to publicly revise any forward-looking statements to reflect events or circumstances that arise after the filing of this Quarterly Report on Form 10-Q.

Table of Contents

Results of Operations

Three Months Ended September 30, 2005 Compared To Three Months Ended September 30, 2004

Net Sales. Consolidated net sales decreased by $43.3 million to $139.6 million, a decrease of 23.7% from the third quarter of 2004.

Sales for the Household Product segment, net of inter-segment sales, decreased $43.6 million to $121.5 million. For the quarter ended September 30, 2005:

- sales of Black & Decker® branded products decreased by $34.2 million to $107.5 million;
- sales of Littermaid® branded products decreased by $3.9 million to $8.6 million; and
- sales of other branded products decreased by $5.3 million to $5.4 million.

The decrease in sales of Black & Decker® branded products in the third quarter of 2005 was primarily attributable to lower sales of the Home Cafe single cup coffee makers, the elimination of certain products identified in our product and customer profitability review and inventory management by significant customers. We expect that sales of Black & Decker® branded products will be lower in the fourth quarter of 2005 as compared to the same period in 2004.

Sales for the Professional Personal Care segment decreased by $2.9 million to $13.8 million for the third quarter of 2005. This decrease was the result of the sale of the Jerdon hotel and hospitality business in October 2004. Sales of products by the Jerdon division totaled $2.7 million in the third quarter of 2004. We expect sales in the Professional Personal Care segment to be lower in the fourth quarter of 2005 compared to 2004 primarily as the result of the sale of the Jerdon hotel and hospitality business.

Sales for the Manufacturing segment decreased $12.3 million to $14.4 million. During the third quarter, inter-segment sales for the Manufacturing segment decreased $15.5 million to $9.9 million. Contract manufacturing sales increased by $3.2 million to $4.4 million as the result of the completion of one remaining project at the Mexican manufacturing facility. We expect sales for the Manufacturing segment to be lower in the fourth quarter of 2005 compared to 2004 as the result of the downsizing and termination of manufacturing operations in Mexico.

Gross Profit. Applica s gross profit margin decreased to 24.1% for the three months ended September 30, 2005 as compared to 27.9% for the same period in 2004. The decrease was primarily attributed to:

- write-downs of property, plant, and equipment of $1.1 million, $1.4 million related to the acceleration of the depreciation of the machinery and equipment used in the manufacturing process and $2.2 million in severance related to the closure of our Mexican manufacturing operations; and
- higher product warranty returns and related expenses of $0.7 million.

We also experienced higher unabsorbed overhead and inefficiencies of $2.1 million at our Mexican manufacturing operations as the result of reduced production associated with our downsizing activities during 2004 and the first half of 2005 and the decision to close the manufacturing facility. Our results of operations for the third quarter were not significantly impacted by the higher unabsorbed overhead and inefficiencies as approximately $2.0 million was capitalized into inventory as of September 30, 2005.

We have experienced an increase in our warranty returns and related expenses in the third quarter as compared to the same period in 2004. We believe that we have taken appropriate measures to combat this issue in a timely and effective manner. These measures include the contracting of an independent third party quality consultant to oversee the production process at our major suppliers in China.

We expect unabsorbed overhead and inefficiencies to continue at our Mexican manufacturing operations in the fourth quarter of 2005 as we ceased production in late October 2005. We also anticipate incurring additional net

severance of $1.6 million and accelerated depreciation of $0.5 million for the remainder of 2005 related to the termination of such manufacturing operations.

The decreases in gross profit margins were partially offset by an improved product mix primarily as a result of the elimination of certain products identified in our product and customer profitability review. We expect our gross profit margins will benefit from improvements in product mix during the remainder of 2005.

Selling, General and Administrative Expenses.

Operating Expenses. Operating expenses decreased by $10.5 million, or 21.9%, to $37.5 million for the three months ended September 30, 2005 compared to the same period in 2004. As a percentage of sales, operating expenses increased slightly to 26.9% in the third quarter of 2005 compared to 26.3% in the 2004 period, primarily as the result of lower sales. Substantially all operating expenses were lower in the third quarter of 2005 compared to the same period in 2004. The following expenses decreased in the third quarter of 2005:

- freight and distribution expense decreased by $2.2 million due to lower sales volume;
- legal and consulting fees decreased by $2.0 million;
- advertising and promotions decreased by $1.4 million;
- payroll expense decreased by $1.3 million due to lower average headcount; and
- royalties and sales-related expense decreased by $1.0 million due to lower sales volume.

Termination Benefits. In the third quarter of 2004, we incurred termination costs of approximately $9.2 million related to the resignation of Applica s former Chairman of the Board and certain other employment and consulting agreements and relationships.

Loss on Sale of Subsidiary. In the third quarter of 2004, we sold Applica Durable Manufacturing Limited, our Hong Kong-based manufacturing operations, and recorded a loss on the sale of approximately $0.8 million, primarily from the realization of cumulative foreign currency translation adjustments.

Interest Expense. Interest expense increased by $0.5 million, or 22.4%, to $2.9 million for the three months ended September 30, 2005, as compared to $2.4 million for the third quarter of 2004, as the result of higher interest rates, despite lower average debt levels. We expect interest rates to continue to increase for the remainder of 2005.

Interest and Other Income. In July 2003, ZonePerfect Nutrition Company, an investment held by a partnership that was 50% owned by Applica, was sold for approximately $160.0 million. A portion of the proceeds from the sale of ZonePerfect was being held in escrow as of December 31, 2004, $8.4 million of which was owed to Applica. Half of this amount ($4.2 million) was recorded as part of the equity in net earnings of joint ventures in 2003. At December 31, 2004, Applica had not collected any portion of the escrowed funds and had included the $4.2 million in other receivables. Management believed that the collection of the remaining $4.2 million was uncertain and, therefore, such amount was not recorded into income as of December 31, 2004.

In February 2005, Applica received approximately $1.6 million in the first distribution of the funds held in escrow. In August 2005, Applica received approximately $3.4 million in the second distribution of the escrowed funds. Applica applied these receipts, totaling $5.0 million, to the receivable balance at December 31, 2004 of $4.2 million and recorded income of $0.8 million. If and when the claims made on the remaining escrowed funds are resolved in its favor, Applica could receive cash and record additional earnings of up to $3.4 million, although it is likely that the claims will be settled for less.

Taxes. Applica s tax provision is based on an estimated annual aggregation of the taxes on earnings of each of its foreign and domestic operations. For the third quarter of 2005, Applica had an effective tax rate of 50% before valuation allowance on deferred tax assets. The effective tax rate for the third quarter of 2004 was 34% before considering the impact on impairment of goodwill, providing for previously untaxed foreign earnings, and the additional valuation allowance on deferred tax assets recorded during the period.

SFAS No. 109, Accounting for Income Taxes requires that a valuation allowance be established when it is more likely than not that all or a portion of a deferred tax asset will not be realized. A review of all available

27

Table of Contents

positive and negative evidence needs to be considered, including a company s current and past performance, the market environment in which the company operates, the utilization of past tax credits and length of carry-back and carry-forward periods. Forming a conclusion that a valuation allowance is not needed is difficult when there is negative objective evidence such as cumulative losses in recent years. Cumulative losses weigh heavily in the overall assessment.

As a result of the review undertaken at September 30, 2005, Applica concluded that it was appropriate to reduce net deferred tax assets by $3.0 million in the third quarter of 2005, primarily related to the net deferred tax assets in the Mexican manufacturing operations that are not likely to be realized. Applica expects to realize the benefits of the remaining net deferred tax assets of approximately $9.6 million as of September 30, 2005, primarily from identified tax planning strategies in the U.S. and Argentina, as well as projected taxable income from other foreign operations.

We expect to continue to maintain a valuation allowance on future tax benefits in the U.S. until an appropriate level of profitability is reached or we are able to develop tax strategies that would enable us to conclude that it is more likely than not that a portion of our deferred tax assets would be realized.

No tax provision was made for the undistributed earnings of the foreign subsidiaries that Applica expects will be permanently reinvested in its operations outside the United States.

Applica has elected on its 2004 U.S. Corporation Income Tax Return to take advantage of new section 965 of the Internal Revenue Code enacted as part of the American Jobs Creation Act of 2004. In general, section 965(a) provides for one taxable year an 85% dividends-received deduction with respect to certain cash dividends a company receives from its controlled foreign corporations. Applica elected the 85% dividends-received deduction on $66.7 million of cash dividends.

There has been no impact to the consolidated financial statements in the three month period ended September 30, 2005 as a result of this election except for an income tax benefit of approximately $0.6 million recorded in the third quarter of 2005 pursuant to Notice 2005-64 issued by the IRS in September 2005.

In October 2005, Applica was notified that Applica Canada Corporation, Applica s Canadian operating subsidiary, was selected for an income tax audit for the 2003 and 2004 fiscal years by the Canada Customs and Revenue Agency. Management believes that adequate provision for taxes has been made for the selected years under examination.

Earnings Per Share. Weighted average basic shares for the three-month periods ended September 30, 2005 and 2004 were 24,163,766 and 24,068,730, respectively. All common stock equivalents were excluded from the diluted per share calculations in the three-month periods ended September 30, 2005 and 2004 because their inclusion would have been anti-dilutive. Potential common stock equivalents for the three-month periods ended September 30, 2005 and 2004 were options to purchase 2,701,405 and 2,185,718 shares of common stock, respectively, with exercise prices ranging from $2.53 to $31.69 and $3.63 to $31.69, respectively.

Nine Months Ended September 30, 2005 Compared To Nine Months Ended September 30, 2004

Net Sales. Consolidated net sales decreased by $97.6 million to $368.5 million, a decrease of 20.9% from the third quarter of 2004.

Sales for the Household Product segment, net of inter-segment sales, decreased $77.7 million to $325.4 million. For the nine months ended September 30, 2005:

- sales of Black & Decker® branded products decreased by $69.3 million to $281.5 million;
- sales of Littermaid® branded products decreased slightly by $0.2 million to $27.0 million; and
- sales of other branded products decreased by $8.0 million to $16.9 million.

The decrease in sales of Black & Decker® branded products in the nine months ended September 30, 2005 compared to the same period in 2004 was primarily attributable to lower sales of the Home Cafe single cup coffee makers and Tide Buzz ultrasonic stain remover, the elimination of certain products identified in our product and customer profitability reviews and inventory management by significant customers. We expect that sales of Black & Decker® branded products will be lower in the fourth quarter of 2005 as compared to the same period in 2004.

Sales for the Professional Personal Care segment decreased by $10.2 million to $37.4 million for the nine months ended September 30, 2005. This decrease was partially the result of the sale of the Jerdon hotel and hospitality business in October 2004. Sales of products by the Jerdon division totaled $7.8 million for the nine months ended September 30, 2004. The remaining decrease was attributable to lower sales of Belson® branded products. We expect sales in the Professional Personal Care segment to be lower in 2005 compared to 2004 primarily as the result of the sale of the Jerdon hotel and hospitality business.

Sales for the Manufacturing segment for the nine months ended September 30, 2005 decreased $114.0 million to $43.2 million. Inter-segment sales for the Manufacturing segment during the nine-month period decreased $104.3 million to $37.5 million. Contract manufacturing sales decreased $9.7 million to $5.8 million. These decreases were primarily the result of the sale of our Hong Kong-based manufacturing operations in July 2004. We expect sales for the Manufacturing segment to be lower in 2005 compared to 2004 as the result of such sale and the downsizing and closing of our manufacturing operations in Mexico.

Gross Profit. Applica s gross profit margin decreased to 20.4% for the nine months ended September 30, 2005 as compared to 27.6% for the same period in 2004. The decrease was primarily attributed to:

- inventory write-downs of $12.8 million related to adjustment to net realizable value of the Home Cafe single cup coffee maker and the Tide Buzz ultrasonic stain remover;

- raw materials inventory write off of $3.3 million, write down of property, plant and equipment of $1.1 million, accelerated depreciation of $2.7 million and severance charges of $2.8 million related to the downsizing and closure of our Mexican manufacturing operations; and

- higher product warranty returns and related expenses of $5.2 million primarily in the first half of 2005.

We also experienced higher unabsorbed overhead and inefficiencies of $6.3 million at our Mexican manufacturing operations as the result of reduced production associated with our downsizing activities during 2004 and the first half of 2005 and decision to close the manufacturing facility in Mexico. Included in cost of goods sold for the nine months ended September 30, 2005 were $2.9 million of these costs. The remaining $3.4 million was capitalized in inventory as of September 30, 2005.

Sales of the first generation Home Café and Tide Buzz were lower than we had anticipated. The size of the Tide Buzz product, the relative complexity of use and price were the main reasons given by consumers for not purchasing the product. Based on this information, we decided to close out the first generation of the Tide Buzz in the first quarter of 2005 and took steps to accelerate the introduction of the next generation. In the second quarter of 2005, our alliance partner introduced a product that performs relatively the same function as the next generation of the Tide Buzz was intended to perform at a price point that made it impractical for us to continue with the development of the next generation.

Our Home Café sales plan for 2005 was based on promotional campaigns by our alliance partner that did not fully materialize. This resulted in lower-than-anticipated consumer demand for the Home Café coffee maker, which resulted in excess inventory. As a result, in the first quarter of 2005, we wrote down the inventory to its net realizable value based on facts and circumstances existing at the time. In the second quarter, we revised the net realizable value of the Home Café inventory primarily based on a lower than anticipated selling price.

We have recently experienced an increase in our warranty returns and related expenses, primarily in the first half of 2005. We believe that we have taken appropriate measures to combat this issue in a timely and effective manner. These measures include the retention of an independent third party quality consultant to oversee the production process at our major suppliers in China and at our manufacturing facility in Mexico.

Table of Contents

We expect unabsorbed overhead and inefficiencies to continue at our Mexican manufacturing operations in the fourth quarter of 2005 as we ceased production in late October 2005. We also anticipate incurring additional net severance of $1.6 million and accelerated depreciation of $0.5 million for the remainder of 2005 related to the termination of such operations.

The decreases in gross profit margins were partially offset by improved product mix primarily as a result of the elimination of certain products identified in our product and customer profitability review. We expect our gross profit margins to continue to benefit from improvements in the product mix for the remainder of 2005.

Selling, General and Administrative Expenses.

Operating Expenses. Operating expenses decreased $18.5 million, or 13.9%, for the nine months ended September 30, 2005 to $115.1 million compared to the same period in 2004. These expenses increased as a percentage of sales to 31.2% in 2005 from 28.7% in the 2004 period, primarily as the result of lower sales. The following expenses decreased for the nine months ended September 30, 2005:

advertising and promotions decreased by $7.6 million;

freight and distribution expense decreased by $3.6 million due to lower sales volume;

legal and consulting fees decreased by $3.2 million;

royalties and sales related decreased by $3.1 million due to lower sales volume;

bad debt expense decreased by $2.7 million; and

payroll expense decreased by $1.1 million due to lower average headcount.

These decreases were offset by increases in depreciation and amortization of $1.3 million, due primarily to the write-off of the Tide Buzz license, and net increases of $1.5 million in various other selling, general, and administrative expenses.

Restructuring and Other Credits. In the first quarter of 2004, we settled an outstanding litigation matter for $125,000 and reversed the remaining accrual of $563,000 related to such litigation.

Termination Benefits. In the third quarter of 2004, we incurred termination costs of approximately $9.2 million related to the resignation of Applica s former Chairman of the Board and certain other employment and consulting agreements and relationships.

Loss on Sale of Subsidiary. In the third quarter of 2004, we sold Applica Durable Manufacturing Limited, our Hong Kong-based manufacturing operations, and recorded a loss on the sale of approximately $0.8 million, primarily from the realization of cumulative foreign currency translation adjustments.

Impairment of Goodwill. As of June 30, 2004, we performed our annual fair value assessment of goodwill, with the assistance of an independent third party valuation group, and determined that the implied value of Applica s goodwill was zero, resulting in a non-cash adjustment in the carrying value of goodwill of $62.8 million. The impairment charge was included as a component of selling, general and administrative expenses in the consolidated statement of operations for the first half of 2004.

Interest Expense. Interest expense increased by $1.3 million, or 18.7%, to $8.0 million for the nine months ended September 30, 2005, as compared to $6.7 million for the same period in 2004. The increase was the result of higher interest rates and higher average debt levels. We expect interest rates to continue to increase for the remainder of 2005.

Interest and Other Income. In July 2003, ZonePerfect Nutrition Company, an investment held by a partnership that was 50% owned by Applica, was sold for approximately $160.0 million. A portion of the proceeds from the sale of ZonePerfect was being held in escrow as of December 31, 2004, $8.4 million of which was owed to Applica. Half of this amount ($4.2 million) was recorded as part of the equity in net earnings of joint ventures in 2003. At December 31, 2004, Applica had not collected any portion of the escrowed funds and had included the $4.2 million in other receivables. Management believed that the collection of the remaining $4.2 million was uncertain and, therefore,

such amount was not recorded into income as of December 31, 2004.

In February 2005, Applica received approximately $1.6 million in the first distribution of the funds held in escrow. In August 2005, Applica received approximately $3.4 million in the second distribution of the escrowed funds. Applica applied these receipts, totaling $5.0 million, to the receivable balance at December 31, 2004 of $4.2 million and recorded income of $0.8 million. If and when the claims made on the remaining escrowed funds are resolved in its favor, Applica could receive cash and record additional earnings of up to $3.4 million, although it is likely that the claims will be settled for less.

Loss On Early Extinguishment of Debt. In February 2004, Applica redeemed $4.25 million of its 10% Senior Subordinated Notes due 2008. The notes were redeemed at prices between 103.25% and 103.33% of the principal amount, plus accrued interest. The cost of the redemption of the notes also included $187,000 in prepayment premiums and write-off of deferred financing costs related to the redemption.

Taxes. Applica s tax expense is based on an estimated annual aggregation of the taxes on earnings of each of its foreign and domestic operations. For the first nine months of 2005, Applica applied an effective tax rate of 30% on its losses from operations before valuation allowances. The effective tax rate for the first nine months of 2004 was 38% before considering the impact on impairment of goodwill, providing for previously untaxed foreign earnings, and the additional valuation allowance on deferred tax assets.

SFAS No. 109, Accounting for Income Taxes requires that a valuation allowance be established when it is more likely than not that all or a portion of a deferred tax asset will not be realized. A review of all available positive and negative evidence needs to be considered, including a company s current and past performance, the market environment in which the company operates, the utilization of past tax credits, length of carry-back and carry-forward periods. Forming a conclusion that a valuation allowance is not needed is difficult when there is negative objective evidence such as cumulative losses in recent years. Cumulative losses weigh heavily in the overall assessment.

As a result of the review undertaken at September 30, 2005, Applica concluded that it was appropriate to reduce net deferred tax assets by $1.6 million for the first nine months of 2005, primarily related to net deferred tax assets in Mexico that are not likely to be realized. Applica expects to realize the benefits of the remaining net deferred tax assets of approximately $9.6 million as of September 30, 2005, primarily from identified tax planning strategies in the U.S. and Argentina, as well as projected taxable income from other countries.

We expect to continue to maintain a valuation allowance on future tax benefits, primarily in the U.S. until an appropriate level of profitability is reached or we are able to develop tax strategies that would enable us to conclude that it is more likely than not that a portion of our deferred tax assets would be realized.

No tax provision is made for the undistributed earnings of the foreign subsidiaries that Applica expects will be permanently reinvested in its operations outside the United States.

Applica has elected on its 2004 U.S. Corporation Income Tax Return to take advantage of new section 965 of the Internal Revenue Code enacted as part of the American Jobs Creation Act of 2004. In general, section 965(a) provides for one taxable year an 85% dividends-received deduction with respect to certain cash dividends a company receives from its controlled foreign corporations. Applica elected the 85% dividends-received deduction on $66.7 million of cash dividends.

There has been no impact to the consolidated financial statements in the nine months ended September 30, 2005 as a result of this election except for an income tax benefit of approximately $0.6 million recorded in the third quarter of 2005 pursuant to Notice 2005-64 issued by the IRS in September 2005.

In October 2005, Applica was notified that Applica Canada Corporation, Applica s Canadian operating subsidiary, was selected for an income tax audit for the years 2003 and 2004 by the Canada Customs and Revenue Agency. Management believes that adequate provision for taxes has been made for the years under examination.

Earnings Per Share. Weighted average basic shares for the nine months ended September 30, 2005 and 2004 were 24,146,599 and 23,935,837, respectively. All common stock equivalents have been excluded from the diluted per share calculations in the nine-month period ended September 30, 2005 and 2004 because their inclusion

Table of Contents

would have been anti-dilutive. Potential common stock equivalents for the nine-month period ended September 30, 2005 and 2004 were options to purchase 2,542,096 and 2,138,567 shares of common stock, respectively, with exercise prices ranging from $2.53 to $31.69 and $3.63 to $31.69, respectively.

Liquidity and Capital Resources

Liquidity

In October 2005, we entered into a secured term loan agreement with Mast Credit Opportunities I, (Master) Ltd. to borrow $20 million. The term loan is secured by a lien on Applica s assets, which is subordinate to the senior credit facility. We used the proceeds from the term loan to repurchase from Mast $5.0 million of our 10% senior subordinated notes due 2008 at 98% of par value. The balance of the proceeds was used to pay down the senior credit facility.

The term loan bears interest at the three-month LIBOR rate plus 625 basis points, which was 10.51% on November 2, 2005. The term loan matures in November 2009 and requires no principal payments until such time. In connection with the repayment of the term loan, after June 30, 2006 we are required to pay an exit fee that increases on a periodic basis from 1% to 4% of the principal amount of the loan. We incurred fees of approximately $0.2 million in connection with the term loan.

We expect to continue to have cash requirements to support seasonal working capital needs and capital expenditures, to pay interest, and to fund operating expenses. In order to meet our cash requirements, we intend to use our existing cash, internally generated funds, and borrowings under our senior credit facility and term loan. Based on our current internal estimates, we believe that cash provided from these sources will be adequate to meet our cash requirements over the next twelve months. However, should the assumptions underlying our estimates prove incorrect, our liquidity may be negatively impacted.

Additionally, our ability to borrow under our senior credit facility line is dependent upon us maintaining a minimum average monthly availability of $20 million. Beginning in December 2005 and through the remaining term of the senior credit facility, we will be required to maintain minimum average monthly availability of $28 million and a daily availability block of $20 million. Factors impacting our ability to maintain that availability include our ability to:

- generate net earnings;
- maintain or improve terms with our suppliers;
- manage inventory levels effectively; and
- maintain or improve accounts receivables days sales outstanding.

If we are unable to maintain the minimum availability or fail to obtain the consent of our lenders to waive such requirements, our liquidity will be negatively affected. We believe that we will be able to maintain such requirements or obtain our lenders consent to waive or amend such requirements. Additionally, if necessary, we believe we will have access to other financing sources to provide the necessary liquidity to finance our short-term cash requirements, such as refinancing our existing senior credit facility, secondary lien financing, or other similar capital markets financing. However, we may not be able to effect any needed refinancing on commercially reasonable terms or at all.

Operating Activities. For the nine months ended September 30, 2005, Applica s operations used cash of $1.5 million, compared with the use of cash of $83.1 million for same period in 2004. The improvement in operating cash flows from the prior period was principally attributable to collections of accounts receivable**.**

As part of our capital management, we review certain working capital metrics. For example, we evaluate our accounts receivable and inventory levels through the computation of days sales outstanding and days in inventory ratio. The number of days sales outstanding at September 30, 2005 increased slightly from the number of days sales outstanding at September 30, 2004. Average days in inventory at September 30, 2005 decreased slightly in comparison to the same period in 2004.

We expect to pay approximately $3.8 million in net severance and other benefits to employees at our Mexican manufacturing facility in the fourth quarter of 2005 as we wind down our Mexican manufacturing operations.

Our results of operations for the periods discussed were negatively impacted by inflation pressures on the price of raw materials. During 2005, we have not been significantly affected by foreign currency fluctuation. We

Table of Contents

generally negotiate our purchase orders with our foreign manufacturers in United States dollars. Thus, our cost under any purchase order is not subject to change after the time the order is placed due to exchange rate fluctuations. However, the weakening of the United States dollar against foreign currencies could result in certain suppliers increasing the United States dollar prices for future product purchases. In addition, we use foreign exchange contracts, which usually mature within one year, to hedge anticipated foreign currency transactions, primarily U.S. dollar inventory purchases by our foreign subsidiaries in Canada and Latin America.

Investing Activities. For the nine months ended September 30, 2005, investing activities generated cash of $0.1 million compared to $19.7 million of cash generated in the nine months ended September 30, 2004. The decrease in cash flows from investing activities was primarily a result of the proceeds generated from the sale of our Hong Kong-based manufacturing operations in July 2004, offset by the following:

- lower capital expenditures associated with the implementation of a new ERP system, which was completed in March 2005; and
- lower capital expenditures for tooling and equipment due to the sale in July 2004 of our Hong Kong-based manufacturing operations and downsizing and closure of our Mexican manufacturing operations.

Applica makes capital expenditures primarily for new product development, product tooling and improvements in technology. Capital expenditures for the first three quarters of 2005 were $3.1 million and were primarily related to the implementation of a new ERP system, which went into production in April 2005. Capital expenditures for 2005 are expected to be approximately $4.5 million and are allocated as follows:

- $3.5 million for the ERP implementation and information technology upgrades;
- $0.2 million for new products; and
- $0.8 million for other improvements.

Applica plans to fund such capital expenditures with cash flow from operations and, if necessary, borrowings under its senior credit facility.

Financing Activities. Net cash used in financing activities was $3.3 million in the nine months ended September 30, 2005, compared to cash provided of $54.7 million in the nine months ended September 30, 2004. The decrease is primarily attributable to higher levels of borrowing in 2004.

Capital Resources

Applica s primary sources of short-term capital are its cash flow from operations and borrowings under its senior credit facility. Applica s credit facility is a $175 million asset-based senior secured revolving credit facility maturing in November 2009. Advances under the credit facility are governed by Applica s collateral value, which is based upon percentages of eligible accounts receivable and inventories.

At Applica s option, interest accrues on the loans made under the senior credit facility at either:

- LIBOR (adjusted for any reserves), plus a specified margin (pursuant to the amended facility set at 2.50% through November 30, 2005), which was 6.36% at September 30, 2005 and 6.59% at November 2, 2005; or
- the Base Rate (which is Bank of America s prime rate), plus a specified margin pursuant to the amended facility set at 0.50% through November 30, 2005), which was 7.25% at September 30, 2005 and 7.50% at November 2, 2005.

Swing loans up to $15.0 million bear interest at the Base Rate plus a specified margin (pursuant to the amended facility set at 0.50% through November 30, 2005), which was 7.25% at September 30, 2005 and 7.50% at November 2, 2005.

Management expects borrowing margins under the senior credit facility to remain at 2.50% and 0.50% for LIBOR and Base Rate borrowings, respectively, for the remainder of 2005.

In June 2005, Applica amended its senior credit facility to provide a temporary increase in liquidity from July through November 2005. Pursuant to the amended facility, from July 1, 2005 through November 30, 2005, Applica is required to maintain a minimum average monthly availability of $20 million and has a daily availability block of $15 million. If Applica fails to maintain the minimum average monthly availability during this period, then Applica must meet certain monthly EBITDA minimums. Beginning in December 2005 and through the remaining term of the credit facility, Applica will be required to maintain minimum average monthly availability of $28 million and a daily availability block of $20 million.

In October 2005, Applica entered into a Second Amendment to Amended and Restated Credit Agreement with the lenders under its senior credit facility, which authorized the term loan transaction. In consideration of such amendment, Applica paid its bank group a fee of $50,000.

As of September 30, 2005, Applica was borrowing approximately $89.4 million under its senior credit facility and had approximately $40.5 million available for future cash borrowings. As of November 2, 2005, Applica was borrowing approximately $82.7 million under the facility and had approximately $45.4 million available for future cash borrowings. There were $1.7 million in letters of credit outstanding under the credit facility at September 30, 2005 and November 2, 2005.

Applica has classified the borrowings under the senior credit facility as a current liability in accordance with Emerging Issues Task Force (EITF) 95-22 Balance Sheet Classifications of Borrowings Outstanding under Revolving Credit Agreements That Include Both a Subjective Acceleration Clause and a Lock-Box Arrangement. Despite such classification, Applica has the ability and the intent to maintain these obligations for longer than one year.

Applica also has senior subordinated notes bearing interest at a rate of 10%, payable semiannually, and maturing on July 31, 2008. The notes are general unsecured obligations of Applica Incorporated and rank subordinate in right of payment to all senior debt of Applica and rank pari passu in right of payment to all future subordinated indebtedness of Applica. The notes may be redeemed at the option of Applica, in whole or in part, at various redemption prices. During 2003 and 2004, Applica repurchased $69.3 million of 10% notes. As of September 30, 2005, the outstanding principal balance was $60.8 million. In October 2005, Applica repurchased an additional $5.0 million of the 10% notes. As of November 2, 2005 the outstanding principal amount of the 10% notes was $55.8 million.

At September 30, 2005, debt as a percent of total capitalization was 70.4%, as compared to 64.0% at September 30, 2004.

Applica s ability to make scheduled payments of principal of, or to pay the interest on, or to refinance, its indebtedness, or to fund planned capital expenditures, and marketing expenses will depend on its future performance. Based upon the current level of operations and cash flow from operations, we believe that we have adequate capital resources to service our debt and fund our liquidity needs for the next year. However, the current level of operations may deteriorate, our business may not generate sufficient cash flow from operations, and future borrowings may not be available under the credit facility in an amount sufficient to enable us to service our indebtedness, including the outstanding 10% notes, or to fund our other liquidity needs. In addition, we may not be able to effect any needed refinancing on commercially reasonable terms or at all.

Use of Estimates and Critical Accounting Policies

The preparation of Applica s financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and revenues and expenses during the period. Future events and their effects cannot be determined with absolute certainty; therefore, the determination of estimates requires the exercise of judgment. Actual results inevitably will differ from those estimates, and such differences may be material to our financial statements. Management continually evaluates its estimates and assumptions, which are based on historical experience and other factors that are believed to be reasonable under the

Table of Contents

circumstances. These estimates and Applica s actual results are subject to the risk factors included in Forward Looking Statement Disclosure above.

Management believes that the following may involve a higher degree of judgment or complexity:

Income Taxes. Applica is subject to income tax laws in many countries. Judgment is required in assessing the future tax consequences of events that have been recognized in Applica s financial statements and tax returns. Significant management judgment is required in developing Applica s provision for income taxes, including the determination of foreign tax liabilities, deferred tax assets and liabilities and any valuation allowances that might be required to be applied against the deferred tax assets. Applica evaluates its ability to realize its deferred tax assets on a quarterly basis and adjusts the amount of its valuation allowance, if necessary. Applica operates within multiple taxing jurisdictions and is subject to audit in those jurisdictions. Because of the complex issues involved, any claims can require an extended period to resolve. In management s opinion, adequate provisions for income taxes have been made.

Applica records a valuation allowance to reduce its deferred tax assets to the amount that Applica believes will more likely than not be realized. While Applica considers future taxable income and ongoing prudent and feasible tax planning strategies in assessing the need for the valuation allowance, in the event it was to determine that it would not be able to realize all or part of its net deferred tax assets in the future, an adjustment to the deferred tax assets would be charged to tax expense in the period such determination is made. Likewise, should Applica determine that it would be able to realize its deferred tax assets in the future in excess of its net recorded amount, an adjustment to the deferred tax assets would increase net income in the period such determination is made.

We believe that our estimates for the valuation allowances reserved against the deferred tax assets are appropriate based on current facts and circumstances. However, it is possible that other people applying reasonable judgment to the same facts and circumstances could develop a different valuation allowance.

Collectibility of Accounts Receivable. Applica records allowances for estimated losses resulting from the inability of its customers to make required payments on their balances. Applica assesses the credit worthiness of its customers based on multiple sources of information and analyzes factors including:

Applica s historical bad debt experiences;

publicly available information regarding its customers and the inherent credit risk related to them;

information from subscription-based credit reporting companies;

trade association data and reports;

current economic trends;

changes in customer payment terms or payment patterns; and

receivables covered under insurance agreements.

This assessment requires significant judgment. If the financial condition of Applica s customers were to worsen, additional write-offs may be required. Such write-offs may not be included in the allowance for doubtful accounts at September 30, 2005 and would result in a charge to income in the applicable period. Conversely, if the financial condition of Applica s customers were to improve or its judgment regarding their financial condition was to change positively, a reduction in the allowances may be required, which would result in an increase in income in the applicable period.

Inventory. Applica values inventory at the lower of cost or market, using the first-in, first-out (FIFO) method, and regularly reviews the book value of discontinued product lines and individual products to determine if these items are properly valued. If market value is less than cost, Applica writes down the related inventory to the estimated net realizable value. Applica regularly evaluates the composition of inventory to identify slow-moving and obsolete inventories to determine if additional write-downs are required. This valuation requires significant judgment from

management as to the saleability of product inventory based on forecasted sales. It is particularly difficult to judge the potential sales of new products. Should the forecasted sales not materialize, it would have a significant impact on Applica s result of operations and the valuation of its inventory, resulting in a charge to income in the applicable period.

Product Liability Claims and Litigation. Applica is subject to lawsuits and other claims related to product liability and other matters that are being handled in the ordinary course of business. Applica maintains accruals for such costs that may be incurred, which are determined on a case-by-case basis, taking into consideration the likelihood of adverse judgments or outcomes, as well as the potential range of probable loss. The accruals are monitored on an ongoing basis and are updated for new developments or new information as appropriate. With respect to product liability claims, Applica estimates the amount of ultimate liability in excess of applicable insurance coverage based on historical claims experience and current claim estimates, as well as other available facts and circumstances. In addition, we have accrued for certain potential product liability claims to the extent we can formulate a reasonable estimate of their costs.

Management believes that the amount of ultimate liability of Applica s current claims and litigation matters, if any, is not likely to have a material effect on its business, financial condition, results of operations or liquidity. However, as the outcome of litigation is difficult to predict, unfavorable significant changes in the estimated exposures could occur resulting in a charge to income in the period such determination is made. Conversely, if favorable changes in the estimated exposures occur, a reduction in the accruals may be required resulting in an increase in income in the period such determination is made.

Long-Lived Assets. Applica reviews long-lived assets and certain identifiable intangibles held and used for possible impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. In evaluating the fair value and future benefits of its intangible assets, management performs an analysis of the anticipated undiscounted future net cash flows of the individual assets over the remaining amortization period. Applica recognizes an impairment loss if the carrying value of the asset exceeds the expected future cash flows.

Other Estimates. During the years, Applica has made significant estimates in connection with specific events affecting its expectations. These have included accruals relating to the consolidation of its operations, plant closings, reduction in employees and product recalls. Applica makes a number of other estimates in the ordinary course of business relating to sales returns and allowances, warranty accruals, and accruals for promotional incentives. Historically, past changes to these estimates have not had a material impact on Applica s financial condition; however, certain changes have significantly affected operations from time to time. Additionally, circumstances could change which may alter future expectations.

Other Matters

Recent Accounting Pronouncements. See Note 1 to the Consolidated Financial Statements included in this Form 10-Q for information related to recent accounting pronouncements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Interest Rate Risk Management

Applica is exposed to the impact of interest rate changes. Applica s objective is to manage the impact of interest rate changes on earnings and cash flows and on the market value of its borrowings. Applica maintains fixed rate debt as a percentage of its net debt between a minimum and maximum percentage, which is set by policy.

It is Applica s policy to enter into interest rate risk management transactions only to the extent considered necessary to meet its objectives as set forth above. Applica does not enter into interest rate risk management transactions for speculative purposes.

As of September 30, 2005, there were no outstanding interest rate management contracts. Applica will initiate interest rate risk management contracts in the fourth quarter of 2005 if required by its policy.

Foreign Exchange Risk Management

Applica transacts business globally and is subject to risks associated with changing foreign exchange rates. Applica s objective is to reduce earnings and cash flow volatility associated with foreign exchange rate changes to allow management to focus attention on core business issues and challenges. By policy, Applica maintains hedge coverage between minimum and maximum percentages of its forecasted foreign exchange exposures for periods not to exceed 18 months. The gains and losses on these contracts offset changes in the value of the related exposures.

Applica enters into various foreign currency hedging contracts that change in value as foreign exchange rates change to protect the value of its existing foreign currency assets and liabilities, commitments and forecasted foreign currency revenues. Applica uses option strategies and forward contracts that provide for the sale of foreign currencies to hedge forecasted revenues and expenses. Applica also uses forward contracts to hedge foreign currency assets and liabilities. While these hedging instruments are subject to fluctuations in value, such fluctuations are offset by changes in the value of the underlying exposures being hedged. The principal currencies hedged historically have been the Mexican peso and Canadian dollar.

It is Applica s policy to enter into foreign currency transactions only to the extent considered necessary to meet its objectives as set forth above. Applica does not enter into foreign currency transactions for speculative purposes. As of September 30, 2005, we had notional amounts of $5.0 million Canadian dollars under foreign currency contracts that expire between October 1, 2005 and November 1, 2005. The fair market value of these contracts is currently immaterial. The fair market value represents the amount Applica would pay upon exiting the contracts at September 30, 2005 and was determined based on market quotes. Applica does not intend to exit these contracts at this time.

Additional Information

For additional information, see Item 7A. Quantitative and Qualitative Disclosures About Market Risk in Applica s Annual Report on Form 10-K for the year ended December 31, 2004.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. Applica has carried out an evaluation under the supervision of management, including the President and Chief Executive Officer (CEO) and the Senior Vice President and Chief Financial Officer (CFO), of the effectiveness of the design and operation of its disclosure controls and procedures. Based on that evaluation, Applica s CEO and CFO have concluded that, as of September 30, 2005, Applica s disclosure controls and procedures were effective to ensure that information required to be disclosed by Applica in the reports filed or submitted by it under the Securities Exchange Act of 1934, as amended, was recorded, processed, summarized and reported within the time periods specified in the rules and regulations of the SEC, and include controls and procedures designed to ensure that information required to be disclosed by Applica in such reports is accumulated and communicated to management, including the CEO and CFO, as appropriate to allow timely decisions regarding required disclosures.

Since the evaluation date by Applica s management of its internal controls over financial reporting, there have not been any changes in Applica s internal controls over financial reporting that have materially affected, or are reasonably likely to materially affect Applica s internal controls over financial reporting.

Limitations on the Effectiveness of Controls Applica s management, including the CEO and CFO, does not expect that our disclosure or internal controls will prevent all errors or fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and not be detected. Despite these limitations, Applica s CEO and CFO have concluded that our disclosure controls and procedures (1) are designed to provide reasonable assurance of achieving their objectives and (2) do provide reasonable assurance of achieving their objectives.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

Applica is subject to legal proceedings, products liability claims and other claims that arise in the ordinary course of our business. In the opinion of management, the amount of ultimate liability, if any, in excess of applicable insurance coverage, is not likely to have a material effect on the financial condition, results of operations or liquidity of Applica. However, as the outcome of litigation or other claims is difficult to predict, significant changes in the estimated exposures could occur.

As a manufacturer and distributor of consumer products, Applica is also subject to the Consumer Products Safety Act, which empowers the Consumer Products Safety Commission (CPSC) to exclude from the market products that are found to be unsafe or hazardous. We receive inquiries from the CPSC in the ordinary course of our business. In the opinion of management, the amount of ultimate liability with respect to such matters, if any, is not likely to have a material effect on Applica s business, financial condition, results of operations or liquidity. However, under certain circumstances, the CPSC could require us to repurchase or recall one or more of our products.

Item 6. Exhibits.

(a) Exhibits:

31.1 Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

31.2 Certification Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.

32.1 Certification Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.

32.2 Certification Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
