AGCO CORPORATION AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
(unaudited)

1. BASIS OF PRESENTATION

The condensed consolidated financial statements of AGCO Corporation and its subsidiaries (the Company or AGCO) included herein have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and the rules and regulations of the Securities and Exchange Commission (SEC). In the opinion of management, the accompanying unaudited condensed consolidated financial statements reflect all adjustments, which are of a normal recurring nature, necessary to present fairly the Company's financial position, results of operations and cash flows at the dates and for the periods presented. These condensed consolidated financial statements should be read in conjunction with the Company's audited financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2007. Results for interim periods are not necessarily indicative of the results for the year.

Stock Compensation Plans

During the three months and nine months ended September 30, 2008, the Company recorded approximately \$6.8 million and \$22.0 million, respectively, of stock compensation expense in accordance with Statement of Financial Accounting Standards (SFAS) No. 123R (Revised 2004), Share-Based Payment (SFAS No. 123R). During the three months and nine months ended September 30, 2007, the Company recorded approximately \$7.0 million and \$10.6 million, respectively, of stock compensation expense in accordance with SFAS No. 123R. The stock compensation expense was recorded as follows (in millions):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Cost of goods sold	\$ 0.3	\$ 0.3	\$ 0.7	\$ 0.4
Selling, general and administrative expenses	6.5	6.7	21.3	10.2
Total stock compensation expense	\$ 6.8	\$ 7.0	\$ 22.0	\$ 10.6

Stock Incentive Plans

Under the 2006 Long Term Incentive Plan (the 2006 Plan) up to 5,000,000 shares of AGCO common stock may be issued. The 2006 Plan allows the Company, under the direction of the Board of Directors' Compensation Committee, to make grants of performance shares, stock appreciation rights, stock options and restricted stock awards to employees, officers and non-employee directors of the Company. The Company's Board of Directors approves grants of awards under the employee and director stock incentive plans described below.

Employee Plans

The 2006 Plan encompasses two stock incentive plans for Company executives and key managers. The primary long-term incentive plan is a performance share plan that provides for awards of shares of the Company's common stock based on achieving financial targets, such as targets for earnings per share and return on invested capital, as determined by the Company's Board of Directors. The stock awards are earned over a performance period, and the number of shares earned is determined based on the cumulative or average results for the period, depending on the measurement. Performance periods are consecutive and overlapping three-year cycles, and performance targets are set at the beginning of each

Table of ContentsNotes to Condensed Consolidated Financial Statements Continued
(unaudited)

cycle. The plan provides for participants to earn from 33% to 200% of the target awards depending on the actual performance achieved, with no shares earned if performance is below the established minimum target. Awards earned under the performance share plan are paid in shares of common stock at the end of each performance period. The compensation expense associated with these awards is amortized ratably over the vesting or performance period based on the Company's projected assessment of the level of performance that will be achieved and earned. During the nine months ended September 30, 2008, the Company granted 272,700 awards under the 2006 Plan for the three-year performance period commencing in 2008 and ending in 2010. Compensation expense recorded with respect to these awards was based upon the stock price as of the grant date. The weighted average grant-date fair value of performance awards granted under the 2006 Plan during the nine months ended September 30, 2008 was \$57.12. Performance award transactions during the nine months ended September 30, 2008 were as follows, and are presented as if the Company were to achieve its target levels of performance under the plan:

Shares awarded but not earned at January 1	942,000
Shares awarded	272,700
Shares forfeited or unearned	(35,538)
Shares earned	
Shares awarded but not earned at September 30	1,179,162

As of September 30, 2008, the total compensation cost related to unearned performance awards not yet recognized, assuming the Company's current projected assessment of the level of performance that will be achieved and earned, was approximately \$29.1 million, and the weighted average period over which it is expected to be recognized is approximately two years.

In addition to the performance share plan, certain executives and key managers are eligible to receive grants of stock settled stock appreciation rights (SSARs) or incentive stock options depending on the participant's country of employment. The SSARs provide a participant with the right to receive the aggregate appreciation in stock price over the market price of the Company's common stock at the date of grant, payable in shares of the Company's common stock. The participant may exercise his or her SSAR at any time after the grant is vested but no later than seven years after the date of grant. The SSARs vest ratably over a four-year period from the date of grant. SSAR award grants made to certain executives and key managers under the 2006 Plan are made with the base price equal to the price of the Company's common stock on the date of grant. During the nine months ended September 30, 2008, the Company granted 107,400 SSAR awards. During the three and nine months ended September 30, 2008, the Company recorded stock compensation expense of approximately \$0.5 million and \$1.3 million, respectively. During the three and nine months ended September 30, 2007, the Company recorded stock compensation expense of approximately \$0.3 million and \$0.8 million, respectively. The compensation expense associated with these awards is being amortized ratably over the vesting period. The Company estimated the fair value of the grants using the Black-Scholes option pricing model. The Company has utilized the simplified method for estimating the expected term of granted SSARs during the nine months ended September 30, 2008 as afforded by SEC Staff Accounting Bulletin (SAB) No. 107,

Share-Based Payment (SAB Topic 14), and SAB No. 110, Share-Based Payment (SAB Topic 14.D.2). The expected term used to value a grant under the simplified method is the mid-point between the vesting date and the contractual term of the option or SSAR. As the Company has only been granting SSARs under the 2006 Plan since April 2006, it does not believe it has sufficient relevant experience regarding employee exercise behavior. The weighted average grant-date fair value of SSARs granted under the 2006 Plan and the weighted average assumptions under the Black-Scholes option model were as follows for the three and nine months ended September 30, 2008:

Table of ContentsNotes to Condensed Consolidated Financial Statements Continued
(unaudited)

	Three Months Ended September 30, 2008	Nine Months Ended September 30, 2008
Weighted average grant date fair value	\$ 16.95	\$ 17.90
Weighted average assumptions under Black-Scholes option model:		
Expected life of awards (years)	5.5	5.5
Risk-free interest rate	3.3%	2.7%
Expected volatility	38.5%	38.0%
Expected dividend yield		
SSAR transactions during the nine months ended September 30, 2008 were as follows:		
SSARs outstanding at January 1		383,500
SSARs granted		107,400
SSARs exercised		(52,812)
SSARs canceled or forfeited		(10,000)
SSARs outstanding at September 30		428,088
SSAR price ranges per share:		
Granted		\$ 51.82-66.20
Exercised		23.80-37.38
Canceled or forfeited		23.80-37.38
Weighted average SSAR exercise prices per share:		
Granted		\$ 56.92
Exercised		29.82
Canceled or forfeited		30.59
Outstanding at September 30		37.92

At September 30, 2008, the weighted average remaining contractual life of SSARs outstanding was approximately five years and there were 69,313 SSARs currently exercisable with exercise prices ranging from \$23.80 to \$37.38, with a weighted average exercise price of \$29.39 and an aggregate intrinsic value of \$0.9 million. As of September 30, 2008, the total compensation cost related to unvested SSARs not yet recognized was approximately \$4.2 million, and the weighted-average period over which it is expected to be recognized is approximately three years.

The following table sets forth the exercise price range, number of shares, weighted average exercise price, and remaining contractual lives by groups of similar price:

Number of	SSARs Outstanding	Weighted Average Exercise	SSARs Exercisable	
	Weighted Average Remaining		Exercisable as of	Weighted Average Exercise

Edgar Filing: AGCO CORP /DE - Form 10-Q

Range of Exercise Prices	Shares	Contractual Life (Years)	Price	September 30, 2008	Price
\$23.80 \$24.61	134,750	4.6	\$23.82	40,875	\$23.83
\$26.00 \$37.38	185,938	5.4	\$37.15	28,438	\$37.38
\$51.82 \$66.20	107,400	6.3	\$56.92		
	428,088			69,313	

The total intrinsic value of SSARs exercised during the nine months ended September 30, 2008 was \$1.6 million and the total fair value of SSARs vested during the same period was \$1.1 million.

Table of Contents

Notes to Condensed Consolidated Financial Statements Continued
(unaudited)

The Company realized a tax benefit of less than \$0.1 million from the exercise of these SSARs. There were 358,775 SSARs that were not vested as of September 30, 2008. The total intrinsic value of outstanding SSARs as of September 30, 2008 was approximately \$3.5 million.

Director Restricted Stock Grants

The 2006 Plan provided for \$25,000 in annual restricted stock grants of the Company's common stock to all non-employee directors. The shares are restricted as to transferability for a period of three years, but are not subject to forfeiture. In the event a director departs from the Board of Directors, the non-transferability period would expire immediately. The plan allows for the director to have the option of forfeiting a portion of the shares awarded in lieu of a cash payment contributed to the participant's tax withholding to satisfy the statutory minimum federal, state and employment taxes which would be payable at the time of grant. The January 1, 2007 grant equated to 8,080 shares of common stock, of which 6,346 shares of common stock were issued, after shares were withheld for withholding taxes. The Company recorded stock compensation expense of approximately \$0.3 million during the first quarter of 2007 associated with these grants.

On December 6, 2007, the Board of Directors approved an increase in the annual restricted stock grant to non-employee directors of the Company under the 2006 Plan from \$25,000 to \$75,000. The 2008 grant was made on April 24, 2008 and equated to 11,320 shares of common stock, of which 8,608 shares of common stock were issued, after shares were withheld for withholding taxes. The Company recorded stock compensation expense of approximately \$0.8 million during the second quarter of 2008 associated with these grants.

As of September 30, 2008, of the 5,000,000 shares reserved for issuance under the 2006 Plan, 2,106,830 shares were available for grant, assuming the maximum number of shares are earned related to the performance award grants discussed above.

Stock Option Plan

The Company's Option Plan provides for the granting of nonqualified and incentive stock options to officers, employees, directors and others. The stock option exercise price is determined by the Company's Board of Directors except in the case of an incentive stock option, for which the purchase price shall not be less than 100% of the fair market value at the date of grant. Each recipient of stock options is entitled to immediately exercise up to 20% of the options issued to such person, and the remaining 80% of such options vest ratably over a four-year period and expire no later than ten years from the date of grant.

There have been no grants under the Company's Option Plan since 2002, and the Company does not intend to make any grants under the Option Plan in the future. Stock option transactions during the nine months ended September 30, 2008 were as follows:

Table of ContentsNotes to Condensed Consolidated Financial Statements Continued
(unaudited)

Options outstanding at January 1	75,500
Options granted	
Options exercised	(16,900)
Options canceled or forfeited	(5,000)
Options outstanding at September 30	53,600
Options available for grant at September 30	1,935,437
Option price ranges per share:	
Granted	\$
Exercised	10.06-22.31
Canceled or forfeited	15.12
Weighted average option exercise prices per share:	
Granted	\$
Exercised	15.14
Canceled or forfeited	15.12
Outstanding at September 30	14.75

At September 30, 2008, the outstanding options had a weighted average remaining contractual life of approximately three years and there were 53,600 options currently exercisable with option prices ranging from \$10.06 to \$20.85 with a weighted average exercise price of \$14.75 and an aggregate intrinsic value of \$1.5 million.

The following table sets forth the exercise price range, number of shares, weighted average exercise price, and remaining contractual lives by groups of similar price:

Range of Exercise Prices	Number of Shares	Options Outstanding		Options Exercisable	
		Weighted Average Remaining Contractual Life (Years)	Weighted Average Exercise Price	Exercisable as of September 30, 2008	Weighted Average Exercise Price
\$10.06 \$11.63	14,900	2.0	\$ 11.48	14,900	\$ 11.48
\$15.12 \$20.85	38,700	3.2	\$ 16.01	38,700	\$ 16.01
	53,600			53,600	

The total intrinsic value of options exercised during the nine months ended September 30, 2008 was \$0.8 million and the total fair value of shares vested during the same period was less than \$0.1 million. Cash received from stock option exercises was approximately \$0.3 million for the nine months ended September 30, 2008. The Company realized an insignificant tax benefit from the exercise of these options.

Recent Accounting Pronouncements

In September 2008, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP) Financial Interpretation No. (FIN) 45-4, An amendment of FIN 45, Guarantor s Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others. The FSP requires additional disclosure about the current status of the payment/performance risk of a guarantee. The FSP is effective for financial statements issued for fiscal years and interim periods ending after November 15, 2008, with early adoption encouraged. The Company will adopt the FSP for the year ended December 31, 2008.

Table of ContentsNotes to Condensed Consolidated Financial Statements Continued
(unaudited)

In May 2008, FASB issued FSP APB 14-1, Accounting for Convertible Debt Instruments That May be Settled in Cash Upon Conversion (including Partial Cash Settlement). The FSP requires that the liability and equity components of convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement), commonly referred to as an Instrument C under EITF Issue No. 90-19, Convertible Bonds with Issuer Options to Settle for Cash Upon Conversion, be separated to account for the fair value of the debt and equity components as of the date of issuance to reflect the issuer's nonconvertible debt borrowing rate. The FSP is effective for financial statements issued for fiscal years beginning after December 15, 2008, and is to be applied retrospectively to all periods presented (retroactive restatement) pursuant to the guidance in SFAS No. 154, Accounting Changes and Error Corrections. The FSP will impact the accounting treatment of the Company's 3/4% convertible senior subordinated notes due 2033 and its 1 1/4% convertible senior subordinated notes due 2036 by reclassifying a portion of the convertible notes balances to additional paid-in capital representing the estimated fair value of the conversion feature as of the date of issuance and creating a discount on the convertible notes that will be amortized through interest expense over the life of the convertible notes. The FSP will result in a significant increase in interest expense and, therefore, reduce net income and basic and diluted earnings per share within the Company's consolidated statements of operations. The Company will adopt the requirements of the FSP on January 1, 2009, and estimates that upon adoption, its retained earnings balance will be reduced by approximately \$37 million, its convertible senior subordinated notes balance will be reduced by approximately \$57 million and its additional paid-in capital balance will increase by approximately \$57 million, including a deferred tax impact of approximately \$37 million. Interest expense, net attributable to the convertible senior subordinated notes during the fiscal year ended December 31, 2009 is expected to increase by approximately \$15 million, compared to 2008, as a result of the adoption.

In March 2008, the FASB issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133 (SFAS No. 161). SFAS No. 161 is intended to improve financial reporting about derivative instruments and hedging activities by requiring enhanced disclosures to enable investors to better understand their effects on an entity's financial position, financial performance and cash flows. SFAS No. 161 is effective for financial statements issued for fiscal years and interim periods beginning after November 15, 2008, with early adoption encouraged. The Company will adopt SFAS No. 161 on January 1, 2009.

In December 2007, the FASB issued SFAS No. 141 (revised 2007), Business Combinations (SFAS No. 141R), and SFAS No. 160, Noncontrolling Interests in Consolidated Financial Statements (SFAS No. 160). SFAS No. 141R requires an acquirer to measure the identifiable assets acquired, the liabilities assumed and any noncontrolling interest in the acquiree at their fair values on the acquisition date, with goodwill being the excess value over the net identifiable assets acquired. SFAS No. 141R also requires the fair value measurement of certain other assets and liabilities related to the acquisition, such as contingencies and research and development. SFAS No. 160 clarifies that a noncontrolling interest in a subsidiary should be reported as equity in a company's consolidated financial statements. Consolidated net income should include the net income for both the parent and the noncontrolling interest, with disclosure of both amounts on a company's consolidated statement of operations. The calculation of earnings per share will continue to be based on income amounts attributable to the parent. The Company is required to adopt SFAS No. 141R and SFAS No. 160 on January 1, 2009.

In March 2007, the Emerging Issues Task Force (EITF) reached a consensus on EITF Issue No. 06-10, Accounting for Collateral Assignment Split-Dollar Life Insurance Arrangements (EITF 06-10), which requires that an employer recognize a liability for the postretirement benefit related to a collateral assignment split-dollar life insurance arrangement in accordance with either SFAS No. 106, Employers' Accounting for Postretirement Benefits Other Than Pensions (SFAS No. 106) (if, in substance, a postretirement benefit plan exists), or Accounting Principles Board Opinion No. 12 (if the arrangement is, in substance, an individual deferred compensation contract) if the employer has agreed to maintain a life

Table of ContentsNotes to Condensed Consolidated Financial Statements Continued
(unaudited)

insurance policy during the employee's retirement or provide the employee with a death benefit based on the substantive agreement with the employee. In addition, the EITF reached a consensus that an employer should recognize and measure an asset based on the nature and substance of the collateral assignment split-dollar life insurance arrangement. The EITF observed that in determining the nature and substance of the arrangement, the employer should assess what future cash flows the employer is entitled to, if any, as well as the employee's obligation and ability to repay the employer. EITF 06-10 is effective for fiscal years beginning after December 15, 2007. The adoption of EITF 06-10 on January 1, 2008 did not have a material effect on the Company's consolidated results of operations or financial position.

In February 2007, the FASB issued SFAS No. 159, The Fair Value Option for Financial Assets and Financial Liabilities (SFAS No. 159). SFAS No. 159 provides companies with an option to report selected financial assets and liabilities at fair value and to provide additional information that will help investors and other users of financial statements to understand more easily the effect on earnings of a company's choice to use fair value. It also requires companies to display the fair value of those assets and liabilities for which they have chosen to use fair value on the face of their balance sheets. The adoption of SFAS No. 159 on January 1, 2008 did not have a material effect on the Company's consolidated results of operations or financial position.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS No. 157). SFAS No. 157 establishes a common definition for fair value to be applied to guidance regarding U.S. generally accepted accounting principles requiring use of fair value, establishes a framework for measuring fair value and expands disclosure about such fair value measurements. SFAS No. 157 is effective for fair value measures already required or permitted by other standards for fiscal years beginning after November 15, 2007. In November 2007, the FASB proposed a one-year deferral of SFAS No. 157's fair value measurement requirements for nonfinancial assets and liabilities that are not required or permitted to be measured at fair value on a recurring basis. The adoption of SFAS No. 157 on January 1, 2008 did not have a material effect on the Company's consolidated results of operations or financial position.

In June 2006, the EITF reached a consensus on EITF Issue No. 06-4, Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements (EITF 06-4), which requires the application of the provisions of SFAS No. 106 to endorsement split-dollar life insurance arrangements. SFAS No. 106 would require the Company to recognize a liability for the discounted future benefit obligation that the Company would have to pay upon the death of the underlying insured employee. An endorsement-type arrangement generally exists when the Company owns and controls all incidents of ownership of the underlying policies. EITF 06-4 is effective for fiscal years beginning after December 15, 2007. The adoption of EITF 06-4 on January 1, 2008 did not have a material effect on the Company's consolidated results of operations or financial position.

2. RESTRUCTURING AND OTHER INFREQUENT EXPENSES (INCOME)

During the second quarter of 2007, the Company announced the closure of its Valtra sales office located in France. The closure resulted in the termination of approximately 15 employees. The Company recorded severance and other facility closure costs of approximately \$0.8 million associated with the closure during 2007, of which approximately \$0.6 million were recorded during the nine months ended September 30, 2007. The Company recorded an additional \$0.2 million of severance and other facility closure costs during the nine months ended September 30, 2008. As of September 30, 2008, all accrued severance and other facility closure costs had been paid and all of the employees had been terminated.

During the third quarter of 2006, the Company announced the closure of two sales offices located in Germany, including a Valtra sales office. The closures resulted in the termination of approximately 13

Table of Contents

Notes to Condensed Consolidated Financial Statements Continued
(unaudited)

employees. The Company recorded severance costs of approximately \$0.5 million associated with the closures during 2006. During the nine months ended September 30, 2007, the Company recorded and paid employee relocation costs associated with the rationalizations of approximately \$0.1 million, and recorded additional severance costs of approximately \$0.1 million. All of the employees associated with these closures had been terminated and all severance costs had been paid as of December 31, 2007. During the second quarter of 2008, the Company recorded and incurred employee relocation costs of approximately \$0.1 million associated with one of the rationalizations.

During the fourth quarter of 2004, the Company initiated the restructuring of certain administrative functions within its Finnish operations, resulting in the termination of 58 employees. As of March 31, 2006, all of the 58 employees had been terminated. As of December 31, 2007, \$0.4 million of severance payments were accrued related to possible government-required payments payable to aged terminated employees who would be eligible for such benefits if they did not secure alternative employment prior to the age of 62. During the first quarter of 2008, the Company was notified that it could offset such payments against future pension-related refunds from the Finnish government and thus reversed the accrual.

During the third quarter of 2004, the Company announced and initiated a plan related to the restructuring of its European combine manufacturing operations located in Randers, Denmark to include the elimination of the facility's component manufacturing operations, as well as the rationalization of the combine model range assembled in Randers. Component manufacturing operations ceased in February 2005. The Company recorded an impairment charge in the third quarter of 2004 to write down certain property, plant and equipment within the component manufacturing operation as the rationalization eliminated a majority of the square footage utilized in the facility. The impairment charge was based upon the estimated fair value of the assets compared to their carrying value. The estimated fair value of the property, plant and equipment was based on current conditions in the market. The machinery, equipment and tooling was disposed of or sold in 2005. The Company sold a portion of the buildings, land and improvements and received cash proceeds of approximately \$4.4 million in September 2007. A gain of approximately \$3.0 million was recorded related to the sale in the third quarter of 2007 and was reflected within Restructuring and other infrequent expenses (income) within the Company's Condensed Consolidated Statements of Operations.

Table of ContentsNotes to Condensed Consolidated Financial Statements Continued
(unaudited)**3. GOODWILL AND OTHER INTANGIBLE ASSETS**

Changes in the carrying amount of acquired intangible assets during the nine months ended September 30, 2008 are summarized as follows (in millions):

	Trademarks and Tradenames	Customer Relationships	Patents and Technology	Total
Gross carrying amounts:				
Balance as of December 31, 2007	\$ 33.4	\$ 103.0	\$ 55.2	\$ 191.6
Foreign currency translation	(0.1)	(5.0)	(1.7)	(6.8)
Balance as of September 30, 2008	\$ 33.3	\$ 98.0	\$ 53.5	\$ 184.8

	Trademarks and Tradenames	Customer Relationships	Patents and Technology	Total
Accumulated amortization:				
Balance as of December 31, 2007	\$ 7.2	\$ 42.6	\$ 32.3	\$ 82.1

Balance as of September 30, 2008	\$ 3.1	\$ 171.7	\$ 463.8	\$ 638.6

SFAS No. 142, Goodwill and Other Intangible Assets, establishes a method of testing goodwill and other indefinite-lived intangible assets for impairment on an annual basis or on an interim basis if an event occurs or circumstances change that would reduce the fair value of a reporting unit below its carrying value. The Company

annual assessments involve determining an estimate of the fair value of the Company's reporting units in order to evaluate whether an impairment of the current carrying amount of goodwill and other indefinite-lived intangible assets exists. The first step of the goodwill impairment test, used to identify potential impairment, compares the fair value of a reporting unit with its carrying amount, including goodwill. If the fair value of a reporting unit exceeds its carrying amount, goodwill of the reporting unit is not considered impaired, and, thus, the second step of the impairment test is unnecessary. If the carrying amount of a reporting unit exceeds its fair value, the second step of the goodwill impairment test is performed to measure the amount of impairment loss, if any. Fair values are derived based on an evaluation of past and expected future performance of the Company's reporting units. A reporting unit is an operating segment or one level below an operating segment, for example, a component. A component of an operating segment is a reporting unit if the component constitutes a business for which discrete financial information is available and the Company's executive management

Table of ContentsNotes to Condensed Consolidated Financial Statements Continued
(unaudited)

team regularly reviews the operating results of that component. In addition, the Company combines and aggregates two or more components of an operating segment as a single reporting unit if the components have similar economic characteristics. The Company's reportable segments reported under the guidance of SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information, are not its reporting units, with the exception of its Asia/Pacific geographical segment.

The second step of the goodwill impairment test, used to measure the amount of impairment loss, compares the implied fair value of the reporting unit goodwill with the carrying amount of that goodwill. If the carrying amount of the reporting unit goodwill exceeds the implied fair value of that goodwill, an impairment loss is recognized in an amount equal to that excess. The loss recognized cannot exceed the carrying amount of goodwill. The implied fair value of goodwill is determined in the same manner as the amount of goodwill recognized in a business combination is determined. That is, the Company allocates the fair value of a reporting unit to all of the assets and liabilities of that unit (including any unrecognized intangible assets) as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the price paid to acquire the reporting unit. The excess of the fair value of a reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill.

The Company utilizes a combination of valuation techniques, including a discounted cash flow approach and a market multiple approach, when making its annual and interim assessments. As stated above, goodwill is tested for impairment on an annual basis and more often if indications of impairment exist. During the fourth quarter of 2008, the Company will be performing its annual impairment testing of goodwill and other intangible assets under SFAS No. 142.

The Company amortizes certain acquired intangible assets primarily on a straight-line basis over their estimated useful lives, which range from three to 30 years.

4. INDEBTEDNESS

Indebtedness consisted of the following at September 30, 2008 and December 31, 2007 (in millions):

	September 30, 2008	December 31, 2007
6 ⁷ / ₈ % Senior subordinated notes due 2014	\$ 282.4	\$ 291.8
1 ³ / ₄ % Convertible senior subordinated notes due 2033	201.3	201.3
1 ¹ / ₄ % Convertible senior subordinated notes due 2036	201.3	201.3
Other long-term debt	0.1	2.5
	685.1	696.9
Less: Current portion of long-term debt		(0.2)
1 ³ / ₄ % Convertible senior subordinated notes due 2033	(201.3)	(201.3)
1 ¹ / ₄ % Convertible senior subordinated notes due 2036	(201.3)	(201.3)
Total indebtedness, less current portion	\$ 282.5	\$ 294.1

On May 16, 2008, the Company entered into a new \$300.0 million unsecured multi-currency revolving credit facility. The new credit facility replaced the Company's former \$300.0 million secured multi-currency revolving credit facility. The maturity date of the new facility is May 16, 2013. Interest accrues on amounts outstanding under the new facility, at the Company's option, at either (1) LIBOR plus a margin ranging between 1.00% and 1.75% based upon the Company's total debt ratio or (2) the higher of the administrative agent's base lending rate or one-half of one percent over the federal funds rate plus a margin ranging between 0.0% and 0.50% based upon the Company's total debt ratio. The new facility contains covenants restricting, among other things, the incurrence of indebtedness and the making of

certain payments, including dividends, and is subject to acceleration in the event of a default, as defined in the new facility. The Company also must fulfill financial covenants in respect of a total debt to EBITDA ratio and an interest coverage ratio, as defined in the facility. As of September 30, 2008, the

Table of ContentsNotes to Condensed Consolidated Financial Statements Continued
(unaudited)

Company had no outstanding borrowings under the new facility. As of September 30, 2008, the Company had availability to borrow \$291.3 million under the new facility.

Holders of the Company's $\frac{3}{4}\%$ convertible senior subordinated notes due 2033 and $1\frac{1}{4}\%$ convertible senior subordinated notes due 2036 may convert the notes, if, during any fiscal quarter, the closing sales price of the Company's common stock exceeds, respectively, 120% of the conversion price of \$22.36 per share for the $\frac{3}{4}\%$ convertible senior subordinated notes and \$40.73 per share for the $1\frac{1}{4}\%$ convertible senior subordinated notes, for at least 20 trading days in the 30 consecutive trading days ending on the last trading day of the preceding fiscal quarter. As of September 30, 2008 and December 31, 2007, the closing sales price of the Company's common stock had exceeded 120% of the conversion price of both notes for at least 20 trading days in the 30 consecutive trading days ending September 30, 2008 and December 31, 2007, and, therefore, the Company classified both notes as current liabilities. Future classification of the notes between current and long-term debt is dependent on the closing sales price of the Company's common stock during future quarters. The Company believes it is unlikely the holders of the notes would convert the notes under the provisions of the indenture agreement, thereby requiring the Company to repay the principal portion in cash. In the event the notes were converted, the Company believes it could repay the notes with available cash on hand, funds from the Company's \$300.0 million multi-currency revolving credit facility or a combination of these sources.

5. INVENTORIES

Inventories are valued at the lower of cost or market using the first-in, first-out method. Market is current replacement cost (by purchase or by reproduction dependent on the type of inventory). In cases where market exceeds net realizable value (i.e., estimated selling price less reasonably predictable costs of completion and disposal), inventories are stated at net realizable value. Market is not considered to be less than net realizable value reduced by an allowance for an approximately normal profit margin. Cash flows related to the sale of inventories are reported within Cash flows from operating activities within the Company's Condensed Consolidated Statements of Cash Flows.

Inventories at September 30, 2008 and December 31, 2007 were as follows (in millions):

	September 30, 2008	December 31, 2007
Finished goods	\$ 515.9	\$ 391.7
Repair and replacement parts	384.1	361.1
Work in process	177.8	88.3
Raw materials	386.4	293.1
Inventories, net	\$ 1,464.2	\$ 1,134.2

Table of ContentsNotes to Condensed Consolidated Financial Statements Continued
(unaudited)**6. PRODUCT WARRANTY**

The warranty reserve activity for the three months ended September 30, 2008 and 2007 consisted of the following (in millions):

	Three Months Ended September 30,	
	2008	2007
Balance at beginning of period	\$ 206.8	\$ 147.3
Accruals for warranties issued during the period	34.0	35.0
Settlements made (in cash or in kind) during the period	(37.1)	(28.7)
Foreign currency translation	(16.9)	5.9
Balance at September 30	\$ 186.8	\$ 159.5

The warranty reserve activity for the nine months ended September 30, 2008 and 2007 consisted of the following (in millions):

	Nine Months Ended September 30,	
	2008	2007
Balance at beginning of period	\$ 167.1	\$ 136.9
Accruals for warranties issued during the period	123.0	100.0
Settlements made (in cash or in kind) during the period	(96.9)	(86.9)
Foreign currency translation	(6.4)	9.5
Balance at September 30	\$ 186.8	\$ 159.5

The Company's agricultural equipment products are generally warranted against defects in material and workmanship for a period of one to four years. The Company accrues for future warranty costs at the time of sale based on historical warranty experience.

7. NET INCOME PER COMMON SHARE

The computation, presentation and disclosure requirements for earnings per share are presented in accordance with SFAS No. 128, Earnings Per Share. Basic earnings per common share is computed by dividing net income by the weighted average number of common shares outstanding during each period. Diluted earnings per common share assumes exercise of outstanding stock options, vesting of performance share awards, vesting of restricted stock and the appreciation of the excess conversion value of the contingently convertible senior subordinated notes using the treasury stock method when the effects of such assumptions are dilutive.

The Company's \$201.3 million aggregate principal amount of 3¼% convertible senior subordinated notes and its \$201.3 million aggregate principal amount of 1¼% convertible senior subordinated notes provide for (i) the settlement upon conversion in cash up to the principal amount of the converted notes with any excess conversion value settled in shares of the Company's common stock, and (ii) the conversion rate to be increased under certain circumstances if the notes are converted in connection with certain change of control transactions. Dilution of weighted shares outstanding will depend on the Company's stock price for the excess conversion value using the treasury stock method. A reconciliation of net income and weighted average common shares outstanding for purposes of calculating basic and diluted earnings per share for the three and nine months ended September 30, 2008 and 2007 is as follows (in millions, except per share data):

Table of ContentsNotes to Condensed Consolidated Financial Statements Continued
(unaudited)

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Basic net income per share:				
Net income	\$ 102.6	\$ 76.9	\$ 298.0	\$ 165.2
Weighted average number of common shares outstanding	91.7	91.6	91.7	91.4
Basic net income per share	\$ 1.12	\$ 0.84	\$ 3.25	\$ 1.81
Diluted net income per share:				
Net income for purposes of computing diluted net income per share	\$ 102.6	\$ 76.9	\$ 298.0	\$ 165.2
Weighted average number of common shares outstanding	91.7	91.6	91.7	91.4
Dilutive stock options, performance share awards and restricted stock awards	0.2	0.1	0.2	0.2
Weighted average assumed conversion of contingently convertible senior subordinated notes	6.4	4.7	7.0	4.1
Weighted average number of common and common equivalent shares outstanding for purposes of computing diluted earnings per share	98.3	96.4	98.9	95.7
Diluted net income per share	\$ 1.04	\$ 0.80	\$ 3.01	\$ 1.73

There were SSARs to purchase 0.1 million shares of the Company's common stock for both the three and nine months ended September 30, 2008 that were excluded from the calculation of diluted earnings per share because they had an antidilutive impact. There were SSARs to purchase 0.2 million shares of the Company's common stock for both the three and nine months ended September 30, 2007 that were excluded from the calculation of diluted earnings per share because they had an antidilutive impact.

8. INCOME TAXES

The Company adopted the provisions of FIN 48, Accounting for Uncertainty in Income Taxes—an interpretation of FASB Statement No. 109 (FIN 48), on January 1, 2007. As a result of the implementation of FIN 48, the Company did not recognize a material adjustment with respect to liabilities for unrecognized tax benefits. At September 30, 2008 and December 31, 2007, the Company had approximately \$31.3 million and \$22.7 million, respectively, of unrecognized tax benefits, all of which would impact the Company's effective tax rate if recognized. As of

September 30, 2008 and December 31, 2007, the Company had approximately \$13.5 million and \$14.0 million, respectively, of current accrued taxes related to uncertain income tax positions connected with ongoing tax audits in various jurisdictions. The Company accrues interest and penalties related to unrecognized tax benefits in its provision for income taxes. As of September 30, 2008 and December 31, 2007, the Company had accrued interest and penalties related to unrecognized tax benefits of \$1.4 million and \$1.1 million, respectively.

The tax years 2001 through 2007 remain open to examination by taxing authorities in the United States and certain other foreign taxing jurisdictions.

Table of ContentsNotes to Condensed Consolidated Financial Statements Continued
(unaudited)**9. DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES**

The Company applies the provisions of SFAS No. 133, Accounting for Derivative Instruments and Hedging Activities, as amended by SFAS No. 138, Accounting for Certain Derivative Instruments and Certain Hedging Activities An Amendment of FASB Statement No. 133. All derivatives are recognized on the Company's Condensed Consolidated Balance Sheets at fair value. On the date the derivative contract is entered into, the Company designates the derivative as either (1) a fair value hedge of a recognized liability, (2) a cash flow hedge of a forecasted transaction, (3) a hedge of a net investment in a foreign operation, or (4) a non-designated derivative instrument.

The Company formally documents all relationships between hedging instruments and hedged items, as well as the risk management objectives and strategy for undertaking various hedge transactions. The Company formally assesses, both at the hedge's inception and on an ongoing basis, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flow of hedged items. When it is determined that a derivative is no longer highly effective as a hedge, hedge accounting is discontinued on a prospective basis.

Foreign Currency Risk

The Company has significant manufacturing operations in the United States, France, Germany, Finland and Brazil, and it purchases a portion of its tractors, combines and components from third-party foreign suppliers, primarily in various European countries and in Japan. The Company also sells products in over 140 countries throughout the world. The Company's most significant transactional foreign currency exposures are the Euro, Brazilian Real and the Canadian dollar in relation to the United States dollar.

The Company attempts to manage its transactional foreign exchange exposure by hedging foreign currency cash flow forecasts and commitments arising from the settlement of receivables and payables and from future purchases and sales. Where naturally offsetting currency positions do not occur, the Company hedges certain, but not all, of its exposures through the use of foreign currency forward contracts. The Company's hedging policy prohibits foreign currency forward contracts for speculative trading purposes.

The Company uses foreign currency forward contracts to economically hedge receivables and payables on the Company and its subsidiaries' balance sheets that are denominated in foreign currencies other than the functional currency. These forward contracts are classified as non-designated derivatives instruments. Gains and losses on such contracts are historically substantially offset by losses and gains on the remeasurement of the underlying asset or liability being hedged. Changes in the fair value of non-designated derivative contracts are reported in current earnings. The foreign currency forward contracts' fair value measurements fall within the Level 2 fair value hierarchy under SFAS No. 157. Level 2 fair value measurements are generally based upon quoted market prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-derived valuations in which all significant inputs or significant value-drivers are observable in active markets. The fair value of foreign currency forward contracts is based on a valuation model that discounts cash flows resulting from the differential between the contract price and the market-based forward rate.

During 2008 and 2007, the Company designated certain foreign currency option contracts as cash flow hedges of expected sales. The effective portion of the fair value gains or losses on these cash flow hedges are recorded in other comprehensive income and subsequently reclassified into cost of goods sold during the same period as the sales were recognized. These amounts offset the effect of the changes in foreign exchange rates on the related sale transactions. The amount of the gain recorded in other

Table of ContentsNotes to Condensed Consolidated Financial Statements Continued
(unaudited)

comprehensive income that was reclassified to cost of goods sold during the nine months ended September 30, 2008 and 2007 was approximately \$20.0 million and \$1.0 million, respectively, on an after-tax basis. The outstanding contracts as of September 30, 2008 range in maturity through December 2009.

The following table summarizes activity in accumulated other comprehensive income related to derivatives held by the Company during the nine months ended September 30, 2008 (in millions):

	Before-Tax Amount	Income Tax	After-Tax Amount
Accumulated derivative net gains as of December 31, 2007	\$ 11.4	\$ 3.7	\$ 7.7
Net changes in fair value of derivatives	(4.8)	(5.7)	0.9
Net gains reclassified from accumulated other comprehensive income into income	(24.5)	(4.5)	(20.0)
Accumulated derivative net losses as of September 30, 2008	\$ (17.9)	\$ (6.5)	\$ (11.4)

The foreign currency option contracts fair value measurements fall within the Level 2 fair value hierarchy under SFAS No. 157. The fair value of foreign currency option contracts is based on a valuation model that utilizes spot and forward exchange rates, interest rates and currency pair volatility.

The Company's senior management establishes the Company's foreign currency and interest rate risk management policies. These policies are reviewed periodically by the Audit Committee of the Company's Board of Directors. The policy allows for the use of derivative instruments to hedge exposures to movements in foreign currency and interest rates. The Company's policy prohibits the use of derivative instruments for speculative purposes.

10. COMPREHENSIVE (LOSS) INCOME

Total comprehensive (loss) income for the three and nine months ended September 30, 2008 and 2007 was as follows (in millions):

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2008	2007	2008	2007
Net income	\$ 102.6	\$ 76.9	\$ 298.0	\$ 165.2
Other comprehensive (loss) income, net of tax:				
Foreign currency translation adjustments	(312.9)	78.4	(150.7)	164.7
Defined benefit pension plans	1.3	8.5	3.9	8.5
Unrealized (loss) gain on derivatives	(27.2)	6.3	(19.1)	6.4
Unrealized gain (loss) on derivatives held by affiliates	0.3	(1.6)	(0.3)	(3.1)
Total comprehensive (loss) income	\$ (235.9)	\$ 168.5	\$ 131.8	\$ 341.7

Table of ContentsNotes to Condensed Consolidated Financial Statements Continued
(unaudited)**11. ACCOUNTS RECEIVABLE SECURITIZATION**

At September 30, 2008, the Company had accounts receivable securitization facilities in the United States, Canada and Europe totaling approximately \$491.2 million. Under the securitization facilities, wholesale accounts receivable are sold on a revolving basis to commercial paper conduits either through a wholly-owned special purpose U.S. subsidiary or a qualifying special purpose entity (QSPE) in the United Kingdom. The Company accounts for its securitization facilities and its wholly-owned special purpose U.S. subsidiary in accordance with SFAS No. 140,

Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities – a Replacement of FASB Statement No. 125 (SFAS No. 140), and FIN No. 46R, Consolidation of Variable Interest Entities – An Interpretation of ARB No. 51 (FIN 46R). Due to the fact that the receivables sold to the commercial paper conduits are an insignificant portion of the conduits' total asset portfolios and such receivables are not siloed, consolidation is not appropriate under FIN 46R, as the Company does not absorb a majority of losses under such transactions. In Europe, the commercial paper conduit that purchases a majority of the receivables is deemed to be the majority beneficial interest holder of the QSPE, and, thus, consolidation by the Company is not appropriate under FIN 46R, as the Company does not absorb a majority of losses under such transactions. In addition, these facilities are accounted for as off-balance sheet transactions in accordance with SFAS No. 140.

Outstanding funding under these facilities totaled approximately \$453.6 million at September 30, 2008 and \$446.3 million at December 31, 2007. The funded balance has the effect of reducing accounts receivable and short-term liabilities by the same amount. Losses on sales of receivables primarily from securitization facilities included in other expense, net were \$7.2 million and \$8.7 million for the three months ended September 30, 2008 and 2007, respectively, and \$21.6 million and \$25.5 million for the nine months ended September 30, 2008 and 2007, respectively. The losses are determined by calculating the estimated present value of receivables sold compared to their carrying amount. The present value is based on historical collection experience and a discount rate representing the spread over LIBOR as prescribed under the terms of the agreements.

The Company continues to service the sold receivables and maintains a retained interest in the receivables. No servicing asset or liability has been recorded as the estimated fair value of the servicing of the receivables approximates the servicing income. The retained interest in the receivables sold is included in the caption Accounts and notes receivable, net within the Company's Condensed Consolidated Balance Sheets. The Company's risk of loss under the securitization facilities is limited to a portion of the unfunded balance of receivables sold, which is approximately 15% of the funded amount.

The Company maintains reserves for the portion of the residual interest it estimates is uncollectible. At September 30, 2008 and December 31, 2007, the fair value of the retained interest was approximately \$76.8 million and \$108.8 million, respectively. The retained interest fair value measurement falls within the Level 3 fair value hierarchy under SFAS No. 157. Level 3 measurements are model-derived valuations in which one or more significant inputs or significant value-drivers are unobservable. The fair value was based upon calculating the estimated present value of the retained interest using a discount rate representing a spread over LIBOR and other key assumptions, such as historical collection experience. The following table summarizes the activity with respect to the fair value of the Company's retained interest in receivables sold during the nine months ended September 30, 2008 (in millions):

Balance at beginning of period	\$ 108.8
Realized gains	0.9
Purchases, issuances and settlements	(32.9)
Balance at September 30, 2008	\$ 76.8

(unaudited)

The Company has an agreement to permit transferring, on an ongoing basis, the majority of its wholesale interest-bearing receivables in North America to AGCO Finance LLC and AGCO Finance Canada, Ltd., its U.S. and Canadian retail finance joint ventures. The Company has a 49% ownership interest in these joint ventures. The transfer of the receivables is without recourse to the Company, and the Company continues to service the receivables. As of September 30, 2008, the balance of interest-bearing receivables transferred to AGCO Finance LLC and AGCO Finance Canada, Ltd. under this agreement was approximately \$67.1 million compared to approximately \$73.3 million as of December 31, 2007.

12. EMPLOYEE BENEFIT PLANS

The Company has defined benefit pension plans covering certain employees, principally in the United States, the United Kingdom, Germany, Finland, Norway, France, Australia and Argentina. The Company also provides certain postretirement health care and life insurance benefits for certain employees, principally in the United States, as well as a supplemental executive retirement plan, which is an unfunded plan that provides Company executives with retirement income for a period of ten years after retirement.

Net pension and postretirement cost for the plans for the three months ended September 30, 2008 and 2007 are set forth below (in millions):

	Three Months Ended September 30,	
	2008	2007
<u>Pension benefits</u>		
Service cost	\$ 3.0	\$ 2.3
Interest cost	11.3	10.8
Expected return on plan assets	(11.3)	(10.6)
Amortization of net actuarial loss and prior service cost	1.3	3.8
Net pension cost	\$ 4.3	\$ 6.3
<u>Postretirement benefits</u>		
Interest cost	\$ 0.4	\$ 0.3
Amortization of prior service credit and unrecognized Net (loss) gain		(0.1)
Other		0.2
Net postretirement cost	\$ 0.4	\$ 0.4

Table of ContentsNotes to Condensed Consolidated Financial Statements Continued
(unaudited)

Net pension and postretirement cost for the plans for the nine months ended September 30, 2008 and 2007 are set forth below (in millions):

	Nine Months Ended September 30,	
	2008	2007
<u>Pension benefits</u>		
Service cost	\$ 9.0	\$ 7.0
Interest cost	33.9	32.5
Expected return on plan assets	(33.9)	(32.0)
Amortization of net actuarial loss and prior service cost	4.1	11.4
Net pension cost	\$ 13.1	\$ 18.9
 <u>Postretirement benefits</u>	 2008	 2007
Service cost	\$	\$ 0.1
Interest cost	1.1	1.0
Amortization of prior service credit	(0.2)	(0.1)
Amortization of unrecognized net loss	0.2	
Other		0.2
Net postretirement cost	\$ 1.1	\$ 1.2

During the nine months ended September 30, 2008, approximately \$24.5 million of contributions were made to the Company's defined benefit pension plans. The Company currently estimates its minimum contributions for 2008 to its defined benefit pension plans will aggregate approximately \$34.3 million. During the nine months ended September 30, 2008, the Company made approximately \$1.5 million of contributions to its U.S.-based postretirement health care and life insurance benefit plans. The Company currently estimates that it will make approximately \$2.1 million of contributions to its U.S.-based postretirement health care and life insurance benefit plans during 2008.

SFAS No. 158, Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans—an amendment of FASB Statements No. 87, 88, 106 and 132(R) (SFAS No. 158), requires companies to measure all defined benefit assets and obligations as of the date of their fiscal year end effective for years ending after December 15, 2008. The Company adopted the measurement date provisions of SFAS No. 158 during the first quarter of 2008 to transition the Company's U.K. pension plan to a December 31 measurement date using the second approach as afforded by paragraph 19 of SFAS No. 158. The impact of the adoption resulted in a reduction to the Company's opening retained earnings balance as of January 1, 2008 of approximately \$1.1 million, net of taxes.

13. SEGMENT REPORTING

The Company has four reportable segments: North America; South America; Europe/Africa/Middle East; and Asia/Pacific. Each regional segment distributes a full range of agricultural equipment and related replacement parts. The Company evaluates segment performance primarily based on income from operations. Sales for each regional segment are based on the location of the third-party customer. The Company's selling, general and administrative expenses and engineering expenses are charged to each segment based on the region and division where the expenses are incurred. As a result, the components of income from operations for one segment may not be comparable to another segment. Segment results for the three and nine months ended September 30, 2008 and 2007 and assets as of September 30, 2008 and December 31, 2007 are as follows (in millions):

14. COMMITMENTS AND CONTINGENCIES

As a result of Brazilian tax legislation impacting value added taxes (VAT), the Company has recorded a reserve of approximately \$18.4 million and \$21.9 million against its outstanding balance of Brazilian VAT taxes receivable as of September 30, 2008 and December 31, 2007, respectively, due to the uncertainty of the Company's ability to collect the amounts outstanding.

The Company is a party to various legal claims and actions incidental to its business. The Company believes that none of these claims or actions, either individually or in the aggregate, is material to its business or financial condition.

As disclosed in Item 3 of the Company's Form 10-K for the year ended December 31, 2007, in February 2006, the Company received a subpoena from the SEC in connection with a non-public, fact-finding inquiry entitled "In the Matter of Certain Participants in the Oil for Food Program." This subpoena requested documents concerning transactions in Iraq under the United Nations Oil for Food Program by the Company and certain of its subsidiaries. Subsequently the Company was contacted by the Department of Justice (the DOJ) regarding the same transactions, although no subpoena or other formal process has been initiated by the DOJ. Other inquiries have been initiated by the Brazilian, Danish, French and U.K. governments regarding subsidiaries of the Company. The inquiries arose from sales of approximately \$58.0 million in farm equipment to the Iraq ministry of agriculture between 2000 and 2002.

The SEC's staff has asserted that certain aspects of those transactions were not properly recorded in the Company's books and records. The Company is cooperating fully in these inquiries, including discussions regarding settlement. It is not possible at this time to predict the outcome of these inquiries or their impact, if any, on the Company; although if the outcomes were adverse, the Company could be required to pay fines and make other payments as well as take appropriate remedial actions.

Table of Contents

Notes to Condensed Consolidated Financial Statements Continued
(unaudited)

On June 27, 2008, the Republic of Iraq filed a civil action in a federal court in New York, Case No. 08 CIV 59617, naming as defendants three of the Company's foreign subsidiaries that participated in the United Nations Oil for Food Program. Ninety-one other entities or companies were also named as defendants in the civil action due to their participation in the United Nations Oil for Food Program. The complaint purports to assert claims against each of the defendants seeking damages in an unspecified amount. Although the Company's subsidiaries intend to vigorously defend against this action, it is not possible at this time to predict the outcome of this action or its impact, if any, on the Company; although if the outcome was adverse, the Company could be required to pay damages.

In August 2008, as part of a routine audit, the Brazilian taxing authorities disallowed deductions relating to the amortization of certain goodwill recognized in connection with a reorganization of the Company's Brazilian operations and the related transfer of certain assets to the Company's Brazilian subsidiaries. The amount of the tax disallowance through June 30, 2008, not including interest and penalties, is approximately \$30 million. The amount ultimately in dispute will be greater because of interest, penalties and future deductions. The Company has been advised by its legal and tax advisors that the Company's position with respect to the deductions is allowable under the tax laws of Brazil. The Company is contesting the disallowance and believes that it is not likely that the assessment, interest or penalties will be required to be paid. However, the ultimate outcome will not be determined until the Brazilian tax appeal process is complete, which could take several years.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

GENERAL

Our operations are subject to the cyclical nature of the agricultural industry. Sales of our equipment have been and are expected to continue to be affected by changes in net cash farm income, farm land values, weather conditions, demand for agricultural commodities, commodity prices and general economic conditions. We record sales when we sell equipment and replacement parts to our independent dealers, distributors or other customers. To the extent possible, we attempt to sell products to our dealers and distributors on a level basis throughout the year to reduce the effect of seasonal demands on manufacturing operations and to minimize our investment in inventory. Retail sales by dealers to farmers are highly seasonal and are a function of the timing of the planting and harvesting seasons. As a result, our net sales have historically been the lowest in the first quarter and have increased in subsequent quarters.

RESULTS OF OPERATIONS

For the three months ended September 30, 2008, we generated net income of \$102.6 million, or \$1.04 per share, compared to net income of \$76.9 million, or \$0.80 per share, for the same period in 2007. For the first nine months of 2008, we generated net income of \$298.0 million, or \$3.01 per share, compared to net income of \$165.2 million, or \$1.73 per share, for the same period in 2007.

Net sales during the third quarter and first nine months of 2008 were \$2,085.4 million and \$6,267.4 million, respectively, which were approximately 29.3% and 34.6% higher than the third quarter and first nine months of 2007, respectively, primarily due to sales growth in all four of our geographical segments as well as the positive impact of currency translation.

Income from operations during the third quarter of 2008 was \$141.7 million compared to \$110.4 million in the third quarter of 2007. Income from operations was \$425.0 million for the first nine months of 2008 compared to \$266.6 million for the same period in 2007. The increases in income from operations were primarily due to the increase in net sales, price increases and cost control initiatives partially offset by higher material costs.

Income from operations increased in our Europe/Africa/Middle East region in the third quarter and first nine months of 2008 primarily due to an increase in net sales resulting from stronger market demand in Europe, improved margins and the favorable impact of currency translation. In the South America region, income from operations increased in the third quarter and first nine months of 2008 due to increased sales volumes resulting from stronger market conditions, primarily in the major markets of Brazil and Argentina, and the impact of favorable currency translation, partially offset by lower margins due to higher material costs and increased levels of product development expenses. Income from operations in North America was higher in the third quarter and first nine months of 2008 compared to the same periods in 2007, primarily due to sales increases resulting from stronger market demand in the professional farming sector, partially offset by negative currency impacts on products sourced from Brazil and Europe. Income from operations in our Asia/Pacific region was higher in the third quarter and first nine months of 2008 compared to the same periods in 2007, primarily due to improved market conditions in Australia and New Zealand.

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations
(continued)

Retail Sales

In North America, industry unit retail sales of tractors for the first nine months of 2008 decreased approximately 5% compared to the first nine months of 2007 resulting primarily from decreases in the utility and compact tractor segments, partially offset by increases in industry unit retail sales of high horsepower tractors. Industry unit retail sales of combines for the first nine months of 2008 were approximately 25% higher than the prior year period. Weaker general economic conditions have reduced demand for compact and utility tractors that are also used in non-farming applications. Higher commodity prices and improved projected farm income in North America contributed to significant increases in sales of high horsepower tractors and combines in the first nine months of 2008. Our unit retail sales of tractors decreased in the first nine months of 2008 compared to the first nine months of 2007. Our unit retail sales of combines increased in the first nine months of 2008 compared to the same period in 2007.

In Europe, industry unit retail sales of tractors for the first nine months of 2008 increased approximately 9% compared to the first nine months of 2007. Retail demand improved in Central and Eastern Europe, Russia, the United Kingdom, Germany and France. Good harvests in 2008 and strong farm income in 2007 supported the increase in demand. Our unit retail sales were also higher in the first nine months of 2008 compared to the same period in 2007.

South American industry unit retail sales of tractors in the first nine months of 2008 increased approximately 36% over the prior year period. Industry unit retail sales of combines for the first nine months of 2008 were approximately 87% higher than the prior year period. Retail sales of tractors and combines in the major market of Brazil increased approximately 43% and 134%, respectively, during the first nine months of 2008 compared to the same period in 2007. The row crop and sugar cane sectors remain strong in Brazil and improved commodity prices have resulted in increased industry demand. Our South American unit retail sales of tractors and combines were also higher in the first nine months of 2008 compared to the same period in 2007.

Outside of North America, Europe and South America, net sales for the first nine months of 2008 increased approximately 18% compared to the prior year period due to higher sales in Australia and New Zealand due to improved harvests.

STATEMENTS OF OPERATIONS

Net sales for the third quarter of 2008 were \$2,085.4 million compared to \$1,613.0 million for the same period in 2007. Net sales for the first nine months of 2008 were \$6,267.4 million compared to \$4,657.0 million for the same prior year period. Net sales increased in all four of AGCO's geographical segments for the third quarter and first nine months of 2008. Foreign currency translation positively impacted net sales by approximately \$120.0 million, or 7.4%, in the third quarter of 2008 and by \$522.9 million, or 11.2%, in the first nine months of 2008. The following table sets forth, for the three and nine months ended September 30, 2008 and 2007, the impact to net sales of currency translation by geographical segment (in millions, except percentages):

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations
(continued)

	Three Months Ended September 30,		Change		Change due to currency translation	
	2008	2007	\$	%	\$	%
North America	\$ 440.4	\$ 349.0	\$ 91.4	26.2%	\$ 2.3	0.7%
South America	466.6	300.1	166.5	55.5%	53.6	17.9%
Europe/Africa/Middle East	1,108.8	913.3	195.5	21.4%	62.4	6.8%
Asia/Pacific	69.6	50.6	19.0	37.6%	1.7	3.4%
	\$ 2,085.4	\$ 1,613.0	\$ 472.4	29.3%	\$ 120.0	7.4%

	Nine Months Ended September 30,		Change		Change due to currency translation	
	2008	2007	\$	%	\$	%
North America	\$ 1,273.8	\$ 1,017.9	\$ 255.9	25.1%	\$ 18.4	1.8%
South America	1,169.1	747.2	421.9	56.4%	156.2	20.9%
Europe/Africa/Middle East	3,639.1	2,766.5	872.6	31.6%	335.5	12.1%
Asia/Pacific	185.4	125.4	60.0	47.8%	12.8	10.2%
	\$ 6,267.4	\$ 4,657.0	\$ 1,610.4	34.6%	\$ 522.9	11.2%

Regionally, net sales in North America increased during the third quarter and first nine months of 2008, primarily due to strong industry conditions supporting increased sales of high horsepower tractors and combines. In the Europe/Africa/Middle East region, net sales increased in the third quarter and first nine months of 2008 primarily due to sales growth in the United Kingdom, Germany, France and Central and Eastern Europe. Net sales in South America increased during the third quarter and first nine months of 2008 primarily as a result of stronger market conditions in the region, predominantly in Brazil. In the Asia/Pacific region, net sales increased in the third quarter and first nine months of 2008 compared to the same periods in 2007 primarily due to sales growth in Australia. We estimate that consolidated price increases during the third quarter and the first nine months of 2008 contributed approximately 4.6% and 3.0% to the increase in sales in the third quarter and the first nine months of 2008, respectively. Consolidated net sales of tractors and combines, which comprised approximately 71% and 72% of our net sales in the third quarter and first nine months of 2008, respectively, increased approximately 26% and 36% during the third quarter and first nine months of 2008, respectively, compared to the same periods in 2007. Unit sales of tractors and combines increased approximately 12% and 17% during the third quarter and first nine months of 2008, respectively, compared to the same periods in 2007. The difference between the unit sales increase and the increase in net sales was primarily the result of foreign currency translation, pricing and sales mix changes.

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations
(continued)

The following table sets forth, for the periods indicated, the percentage relationship to net sales of certain items in our Condensed Consolidated Statements of Operations (in millions, except percentages):

	2008	Three Months Ended September 30,		2007
		% of Net sales		
	\$		\$	% of Net sales
Gross profit	\$ 380.1	18.2%	\$ 307.6	19.1%
Selling, general and administrative expenses	183.5	8.8%	156.6	9.7%
Engineering expenses	49.8	2.4%	38.6	2.4%
Restructuring and other infrequent expenses (income)	0.1		(2.5)	(0.1)%
Amortization of intangibles	5.0	0.2%	4.5	0.3%
Income from operations	\$ 141.7	6.8%	\$ 110.4	6.8%

	2008	Nine Months Ended September 30,		2007
		% of Net sales		
	\$		\$	% of Net sales
Gross profit	\$ 1,123.5	17.9%	\$ 824.0	17.7%
Selling, general and administrative expenses	535.1	8.5%	438.2	9.4%
Engineering expenses	148.2	2.4%	108.3	2.3%
Restructuring and other infrequent expenses (income)	0.3		(2.2)	
Amortization of intangibles	14.9	0.2%	13.1	0.3%
Income from operations	\$ 425.0	6.8%	\$ 266.6	5.7%

Gross profit as a percentage of net sales decreased during the third quarter but increased during the first nine months of 2008 compared to the prior year. Third quarter gross margins in 2008 were lower due to a weaker sales mix in Europe, currency impacts on European and Brazilian export sales and rising raw material costs particularly related to increases in steel costs. Gross margins for the first nine months of 2008 were higher due to the benefits of increased production and cost reduction initiatives offsetting currency impacts and raw material cost inflation. In 2007, supplier constraints at our German manufacturing facility and the production roll-out of a new high-horsepower tractor series pushed sales of certain higher margin products from the first half of 2007 into the third quarter of 2007. As a result, 2007 sales and gross margins in the third quarter benefited from a larger percentage of higher margin Fendt high horsepower tractors in Europe as compared to the third quarter of 2008. In response to increases in manufacturing input costs driven primarily by increases in steel and energy costs, we instituted a series of price increases during the first nine months of 2008. These pricing actions helped to partially offset the impact of rising manufacturing input costs. Additional pricing is planned for the remainder of 2008 in order to further offset the rising costs of materials. However, depending on the timing and acceptance of our pricing in relation to the amount and timing of the cost increases, our gross margins may be negatively impacted. Gross margins in North America continued to be adversely

affected by the impact of the weaker United States dollar on products imported from our European and Brazilian manufacturing facilities. Unit production of tractors and combines for the third quarter and first nine months of 2008 was approximately 11% and 18% higher, respectively, than the comparable periods in 2007. The strong global market conditions have put us near or at capacity in some of our production operations. Therefore, we are making investments in some of our facilities to expand capacity. We are also working with our existing suppliers to prepare them for expected demand levels as well as working to qualify new suppliers to mitigate supply constraints. If supplier constraints occur, they could negatively impact future results. We recorded approximately \$0.3 million and \$0.7 million of stock compensation expense, within cost of goods sold, during the third quarter and first nine months of 2008, respectively, compared to \$0.3 million

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations
(continued)

and \$0.4 million, respectively, of stock compensation expense for comparable periods in 2007, as is more fully explained in Note 1 to our Condensed Consolidated Financial Statements.

Selling, general and administrative (SG&A) expenses as a percentage of net sales decreased during the third quarter and first nine months of 2008 compared to the same prior year periods primarily due to higher sales volumes and cost control initiatives. We recorded approximately \$6.5 million and \$21.3 million of stock compensation expense, within SG&A, during the third quarter and first nine months of 2008, respectively, compared to \$6.7 million and \$10.2 million, respectively, of stock compensation expense for comparable periods in 2007, as is more fully explained in Note 1 to our Condensed Consolidated Financial Statements. Engineering expenses increased during the third quarter and first nine months of 2008 compared to the same prior year periods as a result of continued spending to fund new products, product improvements and cost reduction projects.

We recorded restructuring and other infrequent expenses of approximately \$0.1 million and \$0.3 million, respectively, during the third quarter and the first nine months of 2008 primarily related to severance and employee relocation costs associated with our rationalization of our Valtra sales office located in France, as well as our rationalization of certain parts, sales and marketing and administration functions in Germany. We recorded restructuring and other infrequent income of \$2.5 million and \$2.2 million during the third quarter and the first nine months of 2007, respectively. We sold a portion of the buildings, land and improvements associated with our Randers, Denmark facility and received cash proceeds of approximately \$4.4 million in September 2007. A gain of approximately \$3.0 million was recorded related to the sale in the third quarter of 2007. This gain was partially offset by charges primarily related to severance and employee relocation costs associated with the rationalization of our Valtra sales office located in France as well as the rationalization of certain parts, sales and marketing and administration functions in Germany. See Note 2 to our Condensed Consolidated Financial Statements for further discussion of restructuring activities.

Interest expense, net was \$2.1 million and \$12.7 million for the third quarter and first nine months of 2008, respectively, compared to \$3.4 million and \$17.6 million, respectively, for the comparable periods in 2007, primarily due to a reduction in debt levels and increased interest income earned during the third quarter and the first nine months of 2008 compared to the same periods in 2007.

Other expense, net was \$2.9 million and \$18.5 million during the third quarter and first nine months of 2008, respectively, compared to \$10.5 million and \$28.6 million, respectively, for the same periods in 2007. Losses on sales of receivables, primarily under our securitization facilities, were \$7.2 million and \$21.6 million in the third quarter and first nine months of 2008, respectively, compared to \$8.7 million and \$25.5 million for the same periods in 2007. The decrease was due to lower interest rates in 2008 compared to 2007, partially offset by higher outstanding funding under the securitizations in the third quarter and the first nine months of 2008 as compared to the same periods in 2007. There was also an increase in foreign exchange gains in the third quarter and first nine months of 2008 compared to the same periods in 2007.

We recorded income tax provisions of \$42.7 million and \$128.0 million for the third quarter and first nine months of 2008, respectively, compared to \$26.7 million and \$75.6 million for the comparable periods in 2007. The effective tax rate was 31.2% and 32.5% for the third quarter and first nine months of 2008, respectively, compared to 27.7% and 34.3% in the comparable periods in 2007. Our effective tax rate was positively impacted during 2008 primarily due to reductions in statutory tax rates in the United Kingdom and Germany and a decrease in losses incurred in the United States. The lower rate for the third quarter 2007 was primarily due to the adjustment of the Company's deferred tax balances for impact of the United Kingdom and Germany tax rate changes that became effective in the third quarter 2007.

Management's Discussion and Analysis of Financial Condition and Results of Operations
(continued)

Equity in net earnings from affiliates for the third quarter of 2008 was approximately \$8.6 million compared to \$7.1 million during the third quarter of 2007. For the first nine months of 2008, equity in net earnings from affiliates was approximately \$32.2 million compared to \$20.4 million in the same period of 2007. The increase in earnings in the first nine months of 2008 was primarily due to income associated with our investment in the Laverda S.p.A. operating joint venture that occurred in September 2007, as is more fully described in our annual report on Form 10-K for the year ended December 31, 2007.

RETAIL FINANCE JOINT VENTURES

Our AGCO Finance retail finance joint ventures provide retail financing and wholesale financing to our dealers in the United States, Canada, Brazil, Germany, France, the United Kingdom, Australia, Ireland, Austria and Argentina. The joint ventures are owned 49% by AGCO and 51% by a wholly owned subsidiary of Coöperatieve Centrale Raiffeisen-Boerenleenbank B.A. (Rabobank), a AAA rated financial institution based in the Netherlands. The majority of the assets of the retail finance joint ventures represent finance receivables. The majority of the liabilities represent notes payable and accrued interest. Under the various joint venture agreements, Rabobank or its affiliates are obligated to provide financing to the joint venture companies, primarily through lines of credit. We do not guarantee the debt obligations of the retail finance joint ventures other than a portion of the retail portfolio in Brazil that is held outside the joint venture by Rabobank Brazil, which was approximately \$7.5 million as of December 31, 2007, and will gradually be eliminated over time. As of September 30, 2008, our capital investment in the retail finance joint ventures, which is included in investment in affiliates on our Condensed Consolidated Balance Sheets, was approximately \$205.2 million compared to \$194.0 million as of September 30, 2007. The total finance portfolio in our retail finance joint ventures was approximately \$5.1 billion as of September 30, 2008 compared to \$4.6 billion as of September 30, 2007. The increase in the portfolio between periods was primarily the result of increased sales volumes in both Europe and Brazil, as well as the favorable impact of currency translation. For the first nine months of 2008, our share in the earnings of the retail finance joint ventures, included in Equity in net earnings of affiliates on our Condensed Consolidated Statements of Operations, was \$24.4 million compared to \$19.6 million in the same period of 2007. The increase during the first nine months of 2008 was due primarily to higher finance revenues generated as a result of our increased equipment sales volumes, particularly in Europe and Brazil, and the favorable impact of currency translation. To date, our retail joint ventures have not experienced any significant erosion in the credit quality of the receivables that they own as a result of the recent global economic challenges. However, there can be no assurance that the receivables will not at some point be impaired, and, given the size of the portfolio relative to the joint ventures' level of equity, a significant adverse change would have a material impact on the joint ventures and on our operating results.

The retail finance portfolio in our AGCO Finance joint venture in Brazil was \$1.3 billion as of September 30, 2008 compared to \$1.1 billion as of December 31, 2007 and \$1.2 billion as of September 30, 2007. As a result of weak market conditions in Brazil in 2005 and 2006, a substantial portion of this portfolio has been included in a payment deferral program directed by the Brazilian government. While the joint venture currently considers its reserves for loan losses adequate, the joint venture continually monitors its reserves considering borrower payment history, the value of the underlying equipment financed and further payment deferral programs implemented by the Brazilian government.

LIQUIDITY AND CAPITAL RESOURCES

Our financing requirements are subject to variations due to seasonal changes in inventory and receivable levels. Internally generated funds are supplemented when necessary from external sources, primarily our revolving credit facility and accounts receivable securitization facilities.

Our primary financing and funding sources, with balances outstanding as of September 30, 2008, are our 200.0 million (or approximately \$282.4 million) principal amount 8% senior subordinated notes due 2014, \$201.3 million principal amount 13/4% convertible senior subordinated notes due 2033, \$201.3 million principal amount 11/4% convertible senior subordinated notes due 2036, approximately \$491.2 million of accounts receivable securitization facilities (with approximately \$453.6 million in outstanding funding as of September 30, 2008), and a \$300.0 million multi-currency revolving credit facility (with no amounts outstanding as of September 30, 2008).

Our \$201.3 million of 11/4% convertible senior subordinated notes due December 15, 2036 are unsecured obligations and are convertible into cash and shares of our common stock upon satisfaction of certain conditions, as discussed below. The notes provide for (i) the settlement upon conversion in cash up to the principal amount of the notes with any excess conversion value settled in shares of our common stock, and (ii) the conversion rate to be increased under certain circumstances if the notes are converted in connection with certain change of control transactions occurring prior to December 15, 2013. Interest is payable on the notes at 11/4% per annum, payable semi-annually in arrears in cash on June 15 and December 15 of each year. The notes are convertible into shares of our common stock at an effective price of \$40.73 per share, subject to adjustment. This reflects an initial conversion rate for the notes of 24.5525 shares of common stock per \$1,000 principal amount of notes. In the event of a stock dividend, split of our common stock or certain other dilutive events, the conversion rate will be adjusted so that upon conversion of the notes, holders of the notes would be entitled to receive the same number of shares of common stock that they would have been entitled to receive if they had converted the notes into our common stock immediately prior to such events. If a change of control transaction that qualifies as a fundamental change occurs on or prior to December 15, 2013, under certain circumstances we will increase the conversion rate for the notes converted in connection with the transaction by a number of additional shares (as used in this paragraph, the make whole shares). A fundamental change is any transaction or event in connection with which 50% or more of our common stock is exchanged for, converted into, acquired for or constitutes solely the right to receive consideration that is not at least 90% common stock listed on a U.S. national securities exchange or approved for quotation on an automated quotation system. The amount of the increase in the conversion rate, if any, will depend on the effective date of the transaction and an average price per share of our common stock as of the effective date. No adjustment to the conversion rate will be made if the price per share of common stock is less than \$31.33 per share or more than \$180.00 per share. The number of additional make whole shares ranges from 7.3658 shares per \$1,000 principal amount at \$31.33 per share to 0.1063 shares per \$1,000 principal amount at \$180.00 per share for the year ended December 15, 2008, with the number of make whole shares generally declining over time. If the acquirer or certain of its affiliates in the fundamental change transaction has publicly traded common stock, we may, instead of increasing the conversion rate as described above, cause the notes to become convertible into publicly traded common stock of the acquirer, with principal of the notes to be repaid in cash, and the balance, if any, payable in shares of such acquirer common stock. At no time will we issue an aggregate number of shares of our common stock upon conversion of the notes in excess of 31.9183 shares per \$1,000 principal amount thereof. If the holders of our common stock receive only cash in a fundamental change transaction, then holders of notes will receive cash as well. Holders may convert the notes only under the following circumstances: (1) during any fiscal quarter, if the closing sales price of our common stock exceeds 120% of the conversion price for at least 20 trading days in the 30 consecutive trading days ending on the last trading day of the preceding fiscal quarter; (2) during the five business day period after a five consecutive trading day period in which the trading price per note for each day of that period was less than 98% of the product of the

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations
(continued)

closing sale price of our common stock and the conversion rate; (3) if the notes have been called for redemption; or (4) upon the occurrence of certain corporate transactions. Beginning December 15, 2013, we may redeem any of the notes at a redemption price of 100% of their principal amount, plus accrued interest. Holders of the notes may require us to repurchase the notes at a repurchase price of 100% of their principal amount, plus accrued interest, on December 15, 2013, 2016, 2021, 2026 and 2031. Holders may also require us to repurchase all or a portion of the notes upon a fundamental change, as defined in the indenture, at a repurchase price equal to 100% of the principal amount of the notes to be repurchased, plus any accrued and unpaid interest. The notes are senior subordinated obligations and are subordinated to all of our existing and future senior indebtedness and effectively subordinated to all debt and other liabilities of our subsidiaries. The notes are equal in right of payment with our 6⁷/₈% senior subordinated notes due 2014 and our 1³/₄% convertible senior subordinated notes due 2033.

Our \$201.3 million of 1³/₄% convertible senior subordinated notes due 2033 provide for (i) the settlement upon conversion in cash up to the principal amount of the converted new notes with any excess conversion value settled in shares of our common stock, and (ii) the conversion rate to be increased under certain circumstances if the notes are converted in connection with certain change of control transactions occurring prior to December 10, 2010, but otherwise are substantially the same as the old notes. The notes are unsecured obligations and are convertible into cash and shares of our common stock upon satisfaction of certain conditions, as discussed below. Interest is payable on the notes at 1³/₄% per annum, payable semi-annually in arrears in cash on June 30 and December 31 of each year. The notes are convertible into shares of our common stock at an effective price of \$22.36 per share, subject to adjustment. This reflects an initial conversion rate for the notes of 44.7193 shares of common stock per \$1,000 principal amount of notes. In the event of a stock dividend, split of our common stock or certain other dilutive events, the conversion rate will be adjusted so that upon conversion of the notes, holders of the notes would be entitled to receive the same number of shares of common stock that they would have been entitled to receive if they had converted the notes into our common stock immediately prior to such events. If a change of control transaction that qualifies as a fundamental change occurs on or prior to December 31, 2010, under certain circumstances we will increase the conversion rate for the notes converted in connection with the transaction by a number of additional shares (also as used in this paragraph, the "make whole shares"). A fundamental change is any transaction or event in connection with which 50% or more of our common stock is exchanged for, converted into, acquired for or constitutes solely the right to receive consideration that is not at least 90% common stock listed on a U.S. national securities exchange or approved for quotation on an automated quotation system. The amount of the increase in the conversion rate, if any, will depend on the effective date of the transaction and an average price per share of our common stock as of the effective date. No adjustment to the conversion rate will be made if the price per share of common stock is less than \$17.07 per share or more than \$110.00 per share. The number of additional make whole shares ranges from 13.2 shares per \$1,000 principal amount at \$17.07 per share to 0.1 shares per \$1,000 principal amount at \$110.00 per share for the year ended December 31, 2008, with the number of make whole shares generally declining over time. If the acquirer or certain of its affiliates in the fundamental change transaction has publicly traded common stock, we may, instead of increasing the conversion rate as described above, cause the notes to become convertible into publicly traded common stock of the acquirer, with principal of the notes to be repaid in cash, and the balance, if any, payable in shares of such acquirer common stock. At no time will we issue an aggregate number of shares of our common stock upon conversion of the notes in excess of 58.5823 shares per \$1,000 principal amount thereof. If the holders of our common stock receive only cash in a fundamental change transaction, then holders of notes will receive cash as well. Holders may convert the notes only under the following circumstances: (1) during any fiscal quarter, if the closing sales price of our common stock exceeds 120% of the conversion price for at least 20 trading days in the 30 consecutive trading days ending on the last trading day of the preceding fiscal quarter; (2) during the five business day period after a five consecutive trading day period in which the trading price per note for each day of that period was less than 98% of the product of the closing sale price of our common stock and the conversion rate; (3) if the notes have been called for redemption; or (4) upon the occurrence of

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations
(continued)

certain corporate transactions. Beginning January 1, 2011, we may redeem any of the notes at a redemption price of 100% of their principal amount, plus accrued interest. Holders of the notes may require us to repurchase the notes at a repurchase price of 100% of their principal amount, plus accrued interest, on December 31, 2010, 2013, 2018, 2023 and 2028.

As of September 30, 2008 and December 31, 2007, the closing sales price of our common stock had exceeded 120% of the conversion price of \$22.36 and \$40.73 per share for our 1³/₄% convertible senior subordinated notes and our 1¹/₄% convertible senior subordinated notes, respectively, for at least 20 trading days in the 30 consecutive trading days ending September 30, 2008 and December 31, 2007, and, therefore, we classified both notes as current liabilities. Future classification of the notes between current and long-term debt is dependent on the closing sales price of our common stock during future quarters. We believe it is unlikely the holders of the notes would convert the notes under the provisions of the indenture agreement, as typically convertible securities are not converted prior to expiration unless called for redemption, thereby requiring us to repay the principal portion in cash. In the event the notes were converted, we believe we could repay the notes with available cash on hand, funds from our \$300.0 million multi-currency revolving credit facility or a combination of these sources.

The 1³/₄% convertible senior subordinated notes and the 1¹/₄% convertible senior subordinated notes will impact the diluted weighted average shares outstanding in future periods depending on our stock price for the excess conversion value using the treasury stock method. In May 2008, the Financial Accounting Standards Board (FASB) issued FASB Staff Position (FSP) APB 14-1, Accounting for Convertible Debt Instruments That May be Settled in Cash Upon Conversion (including Partial Cash Settlement). The FSP requires that the liability and equity components of convertible debt instruments that may be settled in cash upon conversion (including partial cash settlement), commonly referred to as an Instrument C under EITF Issue No. 90-19, Convertible Bonds with Issuer Options to Settle for Cash Upon Conversion, be separated to account for the fair value of the debt and equity components as of the date of issuance to reflect the issuer's nonconvertible debt borrowing rate. The FSP is effective for financial statements issued for fiscal years beginning after December 15, 2008, and is to be applied retrospectively to all periods presented (retroactive restatement) pursuant to the guidance in Statement of Financial Accounting Standards (SFAS) No. 154, Accounting Changes and Error Corrections. The FSP will impact the accounting treatment of our 1³/₄% convertible senior subordinated notes due 2033 and our 1¹/₄% convertible senior subordinated notes due 2036 by reclassifying a portion of the convertible notes balances to additional paid-in capital representing the estimated fair value of the conversion feature as of the date of issuance and creating a discount on the convertible notes that will be amortized through interest expense over the life of the convertible notes. The FSP will result in a significant increase in interest expense and, therefore, reduce net income and basic and diluted earnings per share within our consolidated statements of operations. We will adopt the requirements of the FSP on January 1, 2009, and estimate that, upon adoption, our retained earnings balance will be reduced by approximately \$37 million, our convertible senior subordinated notes balance will be reduced by approximately \$57 million and our additional paid-in capital balance will increase by approximately \$57 million, including a deferred tax impact of approximately \$37 million. Interest expense, net attributable to the convertible senior subordinated notes during the fiscal year ended December 31, 2009 is expected to increase by approximately \$15 million, compared to 2008, as a result of the adoption.

On May 16, 2008, we entered into a new \$300.0 million unsecured multi-currency revolving credit facility. The new credit facility replaced our former existing \$300.0 million secured multi-currency revolving credit facility. The maturity date of our new facility is May 16, 2013. Interest accrues on amounts outstanding under the new facility, at our option, at either (1) LIBOR plus a margin ranging between 1.00% and 1.75% based upon our total debt ratio or (2) the higher of the administrative agent's base lending rate or one-half of one percent over the federal funds rate plus a margin ranging between 0.0% and 0.50% based upon our total debt ratio. The new facility contains covenants restricting, among other things, the incurrence of indebtedness and the making of certain payments, including dividends, and

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations
(continued)

is subject to acceleration in the event of a default, as defined in the facility. We also must fulfill financial covenants in respect of a total debt to EBITDA ratio and an interest coverage ratio, as defined in the facility. As of September 30, 2008, we had no outstanding borrowings under the new facility. As of September 30, 2008, we had availability to borrow \$291.3 million under the new facility.

Our former credit facility provided for a \$300.0 million multi-currency revolving credit facility, a \$300.0 million United States dollar denominated term loan and a 120.0 million Euro denominated term loan. The maturity date of the former revolving credit facility was December 2008 and the maturity date for the former term loan facility was June 2009. We were required to make quarterly payments towards the United States dollar denominated term loan and Euro denominated term loan of \$0.75 million and 0.3 million, respectively (or an amortization of one percent per annum until the maturity date of each term loan). On June 29, 2007, we repaid the remaining balances of our outstanding United States dollar and Euro denominated term loans, totaling \$72.5 million and 28.6 million, respectively, with available cash on hand. The former revolving credit facility was secured by a majority of our U.S., Canadian, Finnish and U.K. based assets and a pledge of a portion of the stock of our domestic and material foreign subsidiaries. Interest accrued on amounts outstanding under the former revolving credit facility, at our option, at either (1) LIBOR plus a margin ranging between 1.25% and 2.0% based upon our senior debt ratio or (2) the higher of the administrative agent's base lending rate or one-half of one percent over the federal funds rate plus a margin ranging between 0.0% and 0.75% based on our senior debt ratio. Interest accrued on amounts outstanding under the term loans at LIBOR plus 1.75%. The former credit facility contained covenants restricting, among other things, the incurrence of indebtedness and the making of certain payments, including dividends. We also had to fulfill financial covenants including, among others, a total debt to EBITDA ratio, a senior debt to EBITDA ratio and a fixed charge coverage ratio, as defined in the facility. As of December 31, 2007 and September 30, 2007, we had no outstanding borrowings under the former credit facility. As of December 31, 2007 and September 30, 2007, we had availability to borrow \$291.1 million under the former revolving credit facility.

Our 200.0 million 8% senior subordinated notes due 2014 are unsecured obligations and are subordinated in right of payment to any existing or future senior indebtedness. Interest is payable on the notes semi-annually on April 15 and October 15 of each year. Beginning April 15, 2009, we may redeem the notes, in whole or in part, initially at 103.438% of their principal amount, plus accrued interest, declining to 100% of their principal amount, plus accrued interest, at any time on or after April 15, 2012. In addition, before April 15, 2009, we may redeem the notes, in whole or in part, at a redemption price equal to 100% of the principal amount, plus accrued interest and a make-whole premium. The notes include covenants restricting the incurrence of indebtedness and the making of certain restricted payments, including dividends.

Under our securitization facilities, we sell accounts receivable in the United States, Canada and Europe on a revolving basis to commercial paper conduits through a wholly-owned special purpose U.S. subsidiary and a qualifying special purpose entity (QSPE) in the United Kingdom. The United States and Canadian securitization facilities expire in April 2009 and the European facility expires in October 2011, but each is subject to annual renewal. As of September 30, 2008, the aggregate amount of these facilities was \$491.2 million. The outstanding funded balance of \$453.6 million as of September 30, 2008 has the effect of reducing accounts receivable and short-term liabilities by the same amount. Our risk of loss under the securitization facilities is limited to a portion of the unfunded balance of receivables sold, which is approximately 15% of the funded amount. We maintain reserves for doubtful accounts associated with this risk. If the facilities were terminated, we would not be required to repurchase previously sold receivables but would be prevented from selling additional receivables to the commercial paper conduit.

The securitization facilities allow us to sell accounts receivable through financing conduits which obtain funding from commercial paper markets. Future funding under our securitization facilities

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations
(continued)

depends upon the adequacy of receivables, a sufficient demand for the underlying commercial paper and the maintenance of certain covenants concerning the quality of the receivables and our financial condition. In the event commercial paper demand is not adequate, our securitization facilities provide for liquidity backing from various financial institutions, including Rabobank. These liquidity commitments would provide us with interim funding to allow us to find alternative sources of working capital financing, if necessary.

We have an agreement to permit transferring, on an ongoing basis, the majority of our wholesale interest-bearing receivables in North America to our United States and Canadian retail finance joint ventures, AGCO Finance LLC and AGCO Finance Canada, Ltd. We have a 49% ownership interest in these joint ventures. The transfer of the wholesale interest-bearing receivables is without recourse to AGCO, and we will continue to service the receivables. As of September 30, 2008, the balance of interest-bearing receivables transferred to AGCO Finance LLC and AGCO Finance Canada, Ltd. under this agreement was approximately \$67.1 million compared to approximately \$73.3 million as of December 31, 2007.

Our business is subject to substantial cyclical variations, which generally are difficult to forecast. Our results of operations may also vary from time to time resulting from costs associated with rationalization plans and acquisitions. As a result, we have had to request relief from our lenders on occasion with respect to financial covenant compliance. While we do not currently anticipate asking for any relief, it is possible that we would require relief in the future. Based upon our historical working relationship with our lenders, we currently do not anticipate any difficulty in obtaining that relief.

Cash flow provided by operating activities was \$47.9 million for the first nine months of 2008 compared to cash provided by operating activities of \$32.2 million for the first nine months of 2007. The increase in cash flow provided by operating activities during the first nine months of 2008 was primarily due to higher net income.

Our working capital requirements are seasonal, with investments in working capital typically building in the first half of the year and then reducing in the second half of the year. We had \$769.2 million in working capital at September 30, 2008, as compared with \$638.4 million at December 31, 2007 and \$773.6 million at September 30, 2007. Accounts receivable and inventories, combined, at September 30, 2008 were \$381.2 million higher than at December 31, 2007 and \$208.5 million higher than at September 30, 2007.

Capital expenditures for the first nine months of 2008 were \$155.5 million compared to \$83.6 million for the first nine months of 2007. We anticipate that capital expenditures for the full year of 2008 will range from approximately \$230 million to \$250 million and will primarily be used to support our manufacturing operations, systems initiatives, and to support the development and enhancement of new and existing products.

Our debt to capitalization ratio, which is total long-term debt divided by the sum of total long-term debt and stockholders' equity, was 23.8% at September 30, 2008 compared to 25.4% at December 31, 2007.

From time to time we review and will continue to review acquisition and joint venture opportunities, as well as changes in the capital markets. If we were to consummate a significant acquisition or elect to take advantage of favorable opportunities in the capital markets, we may supplement availability or revise the terms under our credit facilities or complete public or private offerings of equity or debt securities.

We believe that available borrowings under the revolving credit facility, funding under the accounts receivable securitization facilities, available cash and internally generated funds will be sufficient to

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations
(continued)

support our working capital, capital expenditures and debt service requirements for the foreseeable future.

COMMITMENTS AND OFF-BALANCE SHEET ARRANGEMENTS

Guarantees

At September 30, 2008, we were obligated under certain circumstances to purchase, through the year 2010, up to \$4.0 million of equipment upon expiration of certain operating leases between AGCO Finance LLC and AGCO Finance Canada, Ltd., our retail finance joint ventures in North America, and end users. We also maintain a remarketing agreement with these joint ventures whereby we are obligated to repurchase repossessed inventory at market values, limited to \$6.0 million in the aggregate per calendar year. We believe that any losses, which might be incurred on the resale of this equipment, will not materially impact our consolidated financial position or results of operations.

From time to time, we sell certain trade receivables under factoring arrangements to financial institutions throughout the world. We evaluate the sale of such receivables pursuant to the guidelines of SFAS No. 140,

Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities—a Replacement of FASB Statement No. 125, and have determined that these facilities should be accounted for as off-balance sheet transactions in accordance with SFAS No. 140.

At September 30, 2008, we guaranteed indebtedness owed to third parties of approximately \$129.6 million, primarily related to dealer and end-user financing of equipment. We believe the credit risk associated with these guarantees is not material to our financial position.

Other

At September 30, 2008, we had foreign currency forward contracts to buy an aggregate of approximately \$555.3 million United States dollar equivalents and foreign currency forward contracts to sell an aggregate of approximately \$316.1 million United States dollar equivalents. The outstanding contracts as of September 30, 2008 range in maturity through December 2009. See Item 3. Quantitative and Qualitative Disclosures About Market Risk Foreign Currency Risk Management for further information.

Contingencies

As a result of Brazilian tax legislation impacting value added taxes (VAT), we have recorded a reserve of approximately \$18.4 million and \$21.9 million against our outstanding balance of Brazilian VAT taxes receivable as of September 30, 2008 and December 31, 2007, respectively, due to the uncertainty as to our ability to collect the amounts outstanding.

As disclosed in Item 3 of our Form 10-K for the year ended December 31, 2007, in February 2006, we received a subpoena from the Securities and Exchange Commission (the SEC) in connection with a non-public, fact-finding inquiry entitled In the Matter of Certain Participants in the Oil for Food Program. Similar investigations are being conducted by others. In June 2008, the Republic of Iraq filed a civil action against three of our foreign subsidiaries that participated in the United Nations Oil for Food Program. See Part II, Item 1, Legal Proceedings for further discussion of these matters.

Management's Discussion and Analysis of Financial Condition and Results of Operations
(continued)

OUTLOOK

For the full year of 2008, farm equipment sales are expected to increase from 2007 levels. Modest growth in industry retail sales in Western Europe and continued market expansion in Eastern and Central Europe is expected to result in sales above 2007 levels. In North America, the slowing general economy is expected to produce weaker industry retail sales of compact and utility tractors, but improved farm income and healthy farmer balance sheets are expected to result in increased industry retail sales of high horsepower tractors and combines compared to 2007. In South America, favorable farm fundamentals in Brazil and Argentina are expected to produce increased industry retail sales.

For the full year of 2008, we are targeting earnings improvement compared to the full year of 2007 resulting primarily from higher sales volumes and improved operating margins.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The discussion and analysis of our financial condition and results of operations are based upon our Condensed Consolidated Financial Statements, which have been prepared in accordance with U.S. generally accepted accounting principles. The preparation of these financial statements requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an ongoing basis, management evaluates estimates, including those related to reserves, intangible assets, income taxes, pension and other postretirement benefit obligations, derivative financial instruments and contingencies. Management bases these estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances. Actual results may differ from these estimates under different assumptions or conditions. A description of critical accounting policies and related judgment and estimates that affect the preparation of our Condensed Consolidated Financial Statements is set forth in our Annual Report on Form 10-K for the year ended December 31, 2007.

FORWARD-LOOKING STATEMENTS

Certain statements in Management's Discussion and Analysis of Financial Condition and Results of Operations and elsewhere in this Quarterly Report on Form 10-Q are forward looking, including certain statements set forth under the headings General, Statements of Operations, Retail Finance Joint Ventures, Liquidity and Capital Resources, Commitments and Off-Balance Sheet Arrangements and Outlook. Forward-looking statements reflect assumptions, expectations, projections, intentions or beliefs about future events. These statements, which may relate to such matters as industry demand conditions, earnings per share, net sales and income, income from operations, planned price increases, conversion of outstanding notes, future capital expenditures and indebtedness requirements, working capital needs and currency translation, are forward-looking statements within the meaning of the federal securities laws. These statements do not relate strictly to historical or current facts, and you can identify certain of these statements, but not necessarily all, by the use of the words anticipate, assumed, indicate, estimate, believe, predict, forecast, expect, continue, grow and other words of similar meaning. Although we believe that the expectations and assumptions reflected in these statements are reasonable in view of the information currently available to us, there can be no assurance that these expectations will prove to be correct.

Table of Contents

Management's Discussion and Analysis of Financial Condition and Results of Operations
(continued)

These forward-looking statements involve a number of risks and uncertainties, and actual results may differ materially from the results discussed in or implied by the forward-looking statements. Adverse changes in any of the following factors could cause actual results to differ materially from the forward-looking statements:

general economic and capital market conditions;

the worldwide demand for agricultural products;

grain stock levels and the levels of new and used field inventories;

cost of steel and other raw materials;

performance of the accounts receivable originated or owned by AGCO or AGCO Finance;

government policies and subsidies;

weather conditions;

interest and foreign currency exchange rates;

pricing and product actions taken by competitors;

commodity prices, acreage planted and crop yields;

farm income, land values, debt levels and access to credit;

pervasive livestock diseases;

production disruptions;

supply and capacity constraints;

our cost reduction and control initiatives;

our research and development efforts;

dealer and distributor actions;

technological difficulties; and

political and economic uncertainty in various areas of the world.

Any forward-looking statement should be considered in light of such important factors. For additional factors and additional information regarding these factors, please see "Risk Factors" in our Form 10-K for the year ended December 31, 2007.

New factors that could cause actual results to differ materially from those described above emerge from time to time, and it is not possible for us to predict all of such factors or the extent to which any such factor or combination of factors may cause actual results to differ from those contained in any forward-looking statement. Any forward-looking

statement speaks only as of the date on which such statement is made, and we disclaim any obligation to update the information contained in such statement to reflect subsequent developments or information except as required by law.

Table of Contents

**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK
FOREIGN CURRENCY RISK MANAGEMENT**

We have significant manufacturing operations in France, Germany, Finland and Brazil, and we purchase a portion of our tractors, combines and components from third-party foreign suppliers, primarily in various European countries and in Japan. We also sell products in over 140 countries throughout the world. The majority of our net sales outside the United States are denominated in the currency of the customer location with the exception of sales in the Middle East, Africa and Asia, where net sales are primarily denominated in British pounds, Euros or United States dollars (See Segment Reporting in Note 14 to our Consolidated Financial Statements for the year ended December 31, 2007 for sales by customer location). Our most significant transactional foreign currency exposures are the Euro, the Brazilian Real and the Canadian dollar in relation to the United States dollar. Fluctuations in the value of foreign currencies create exposures, which can adversely affect our results of operations.

We attempt to manage our transactional foreign exchange exposure by hedging foreign currency cash flow forecasts and commitments arising from the settlement of receivables and payables and from future purchases and sales. Where naturally offsetting currency positions do not occur, we hedge certain, but not all, of our exposures through the use of foreign currency forward and option contracts. Our hedging policy prohibits foreign currency forward contracts for speculative trading purposes. Our translation exposure resulting from translating the financial statements of foreign subsidiaries into United States dollars is not hedged. Our most significant translation exposures are the Euro, the British pound and the Brazilian Real in relation to the United States dollar. When practical, this translation impact is reduced by financing local operations with local borrowings.

All derivatives are recognized on our Condensed Consolidated Balance Sheets at fair value. On the date a derivative contract is entered into, we designate the derivative as either (1) a fair value hedge of a recognized liability, (2) a cash flow hedge of a forecasted transaction, (3) a hedge of a net investment in a foreign operation, or (4) a non-designated derivative instrument. We currently engage in derivatives that are cash flow hedges of forecasted transactions as well as non-designated derivative instruments. Changes in the fair value of non-designated derivative contracts are reported in current earnings. During 2008 and 2007, we designated certain foreign currency option contracts as cash flow hedges of expected future sales. The effective portion of the fair value gains or losses on these cash flow hedges are recorded in other comprehensive income, with the cumulative gain or loss subsequently reclassified into cost of goods sold during the same period as the sales are recognized. These amounts offset the effect of the changes in foreign exchange rates on the related sale transactions. The amount of the gain recorded in other comprehensive income that was reclassified to cost of goods sold during the nine months ended September 30, 2008 and 2007 was approximately \$20.0 million and \$1.0 million, respectively, on an after-tax basis. The outstanding contracts as of September 30, 2008 range in maturity through December 2009.

Table of Contents

The following is a summary of foreign currency derivative contracts used to hedge currency exposures. The outstanding contracts as of September 30, 2008 range in maturity through December 2009. The net notional amounts and fair value gains or losses as of September 30, 2008 stated in United States dollars are as follows (in millions, except average contract rate):

	Net Notional Amount (Sell)/Buy	Average Contract Rate*	Fair Value Gain/(Loss)
Australian dollar	\$ (23.2)	1.20	\$ 1.2
Brazilian real	501.9	1.70-2.20**	(32.7)
British pound	6.7	0.49	(1.0)
Canadian dollar	(3.9)	1.07	
Euro	(208.3)	0.71	(0.4)
Japanese yen	22.5	108.54	0.5
Mexican peso	(30.5)	10.70	0.7
New Zealand dollar	(3.9)	1.57	(0.2)
Norwegian krona	8.0	5.87	
Polish zloty	(3.3)	2.33	0.1
Russian ruble	(42.9)	25.64	
Swedish krona	16.1	6.83	(0.2)
South African rand	(0.1)	8.44	
Swiss franc	0.1	1.12	0.1
			\$ (31.9)

* per United States dollar

** Contracts include various option contracts within the 1.70 to 2.20 range

Because these contracts were entered into for hedging purposes, the gains and losses on the contracts would largely be offset by gains and losses on the underlying firm commitment.

Interest Rates

We manage interest rate risk through the use of fixed rate debt and may in the future utilize interest rate swap contracts. We have fixed rate debt from our senior subordinated notes and our convertible senior subordinated notes. Our floating rate exposure is related to our credit facility and our securitization facilities, which are tied to changes in United States and European LIBOR rates. Assuming a 10% increase in interest rates, interest expense, net and the cost of our securitization facilities for the nine months ended September 30, 2008 would have increased by approximately \$1.2 million.

We had no interest rate swap contracts outstanding in the nine months ended September 30, 2008.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our Chief Executive Officer and Chief Financial Officer, after evaluating the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended) as of September 30, 2008, have concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

The Company's management, including the Chief Executive Officer and the Chief Financial Officer, does not expect that the Company's disclosure controls or the Company's internal controls will prevent all errors and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefits of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, have been detected. Because of the inherent limitations in a cost effective control system, misstatements due to error or fraud may occur and not be detected. We will conduct periodic evaluations of our internal controls to enhance, where necessary, our procedures and controls.

Changes in Internal Control Over Financial Reporting

There were no changes in our internal control over financial reporting identified in connection with the evaluation described above that occurred during the nine months ended September 30, 2008 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are a party to various legal claims and actions incidental to our business. We believe that none of these claims or actions, either individually or in the aggregate, is material to our business or financial condition.

As disclosed in Item 3 of the Company's Form 10-K for the year ended December 31, 2007, in February 2006, the Company received a subpoena from the SEC in connection with a non-public, fact-finding inquiry entitled "In the Matter of Certain Participants in the Oil for Food Program." This subpoena requested documents concerning transactions in Iraq under the United Nations Oil for Food Program by the Company and certain of its subsidiaries. Subsequently the Company was contacted by the Department of Justice (the "DOJ") regarding the same transactions, although no subpoena or other formal process has been initiated by the DOJ. Other inquiries have been initiated by the Brazilian, Danish, French and U.K. governments regarding subsidiaries of the Company. The inquiries arose from sales of approximately \$58.0 million in farm equipment to the Iraq ministry of agriculture between 2000 and 2002. The SEC's staff has asserted that certain aspects of those transactions were not properly recorded in the Company's books and records. The Company is cooperating fully in these inquiries, including discussions regarding settlement. It is not possible at this time to predict the outcome of these inquiries or their impact, if any, on the Company; although if the outcomes were adverse, the Company could be required to pay fines and make other payments as well as take appropriate remedial actions.

On June 27, 2008, the Republic of Iraq filed a civil action in a federal court in New York, Case No. 08 CIV 59617, naming as defendants three of the Company's foreign subsidiaries that participated in the United Nations Oil for Food Program. Ninety-one other entities or companies were also named as defendants in the civil action due to their participation in the United Nations Oil for Food Program. The complaint purports to assert claims against each of the defendants seeking damages in an unspecified amount. Although the Company's subsidiaries intend to vigorously defend against this action, it is not possible at this time to predict the outcome of this action or its impact, if any, on the Company; although if the outcome was adverse, the Company could be required to pay damages.

In August 2008, as part of a routine audit, the Brazilian taxing authorities disallowed deductions relating to the amortization of certain goodwill recognized in connection with a reorganization of the Company's Brazilian operations and the related transfer of certain assets to the Company's Brazilian subsidiaries. The amount of the tax disallowance through June 30, 2008, not including interest and penalties, is approximately \$30 million. The amount ultimately in dispute will be greater because of interest, penalties and future deductions. The Company has been advised by its legal and tax advisors that the Company's position with respect to the deductions is allowable under the tax laws of Brazil. The Company is contesting the disallowance and believes that it is not likely that the assessment, interest or penalties will be required to be paid. However, the ultimate outcome will not be determined until the Brazilian tax appeal process is complete, which could take several years.
