INCORPORATION BY REFERENCE

Sappi Limited's report for the conformed second quarter results ended March 2008, furnished by the Registrant under this Form 6-K, is incorporated by reference into (i) the Registration Statements on Form S-8 of the Registrant filed December 23, 1999 and December 15, 2004 in connection with The Sappi Limited Share Incentive Scheme, (ii) the Section 10(a) Prospectus relating to the offer and sale of the Registrant's shares to Participants under The Sappi Limited Share Incentive Scheme, (iii) the Registration Statements on Form S-8 of the Registrant filed December 15, 2004 and December 21, 2005 in connection with The Sappi Limited 2004 Performance Share Incentive Plan and (iv) the Section 10(a) Prospectus relating to the offer and sale of the Registrant's shares to Participants under The Sappi Limited 2004 Performance Share Incentive Plan. This Form 6-K includes a conformed version of the earnings announcement sent by the Registrant to its shareholders. This conformed version was prepared solely for purposes of supplementing the documents referred to in clauses (i) - (iv) above.

FORWARD-LOOKING STATEMENTS

In order to utilize the "Safe Harbor" provisions of the United States Private Securities Litigation Reform Act of 1995 (the "Reform Act"), Sappi Limited (the "Company") is providing the following cautionary statement. Except for historical information contained herein, statements contained in this Report on Form 6-K may constitute "forward-looking statements" within the meaning of the Reform Act. The words "believe", "anticipate", "expect", "intend", "estimate", "plan", "assume", "positioned", "will", "may", "should", "risk" and other similar expressions which are predictions of or indicate future events and future trends which do not relate to historical matters identify forward-looking statements. In addition, this Report on Form 6-K may include forward-looking statements relating to the Company's potential exposure to various types of market risks, such as interest rate risk, foreign exchange rate risk and commodity price risk. Reliance should not be placed on forward-looking statements because they involve known and unknown risks, uncertainties and other factors which are in some cases beyond the control of the Company, together with its subsidiaries (the "Group"), and may cause the actual results, performance or achievements of the Group to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements (and from past results, performance or achievements). Certain factors that may cause such differences include but are not limited to: the highly cyclical nature of the pulp and paper industry; pulp and paper production, production capacity, input costs (including raw material, energy and employee costs) and pricing levels in North America, Europe, Asia and southern Africa; any major disruption in production at the Group's key facilities; changes in environmental, tax and other laws and regulations; adverse changes in the markets for the Group's products; any delays, unexpected costs or other problems experienced with any business acquired or to be acquired and achieving expected savings and synergies; consequences of the Group's leverage (including as a result of adverse changes in credit markets that affect our ability to raise capital when needed); adverse changes in the political situation and economies in the countries in which we operate or the effect of governmental efforts to address present or future economic or social problems; and the impact of future investments, acquisitions and dispositions (including the financing of investments and acquisitions) and any delays, unexpected costs or other problems experienced in connection with dispositions. These and other risks, uncertainties and factors are discussed in the Company's Annual Report on Form 20-F and other filings with and submissions to the Securities and Exchange Commission, including this Report on Form 6-K. Shareholders and prospective investors are cautioned not to place undue reliance on these forward-looking statements. These forward-looking statements are made as of the date of the submission of this Report on Form 6-K and are not intended to give any assurance as to future results. The Company undertakes no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new

information or future events or circumstances or otherwise.

second quarter

Comment

Our profitability improved in the quarter compared to a year ago and to the prior quarter. The performance of our southern African businesses was supported by good demand, increasing prices and a weaker Rand against the Dollar. Production was, however, unfavourably impacted by national power curtailment and lower output at Saiccor. Sappi Fine Paper North America continued its improving trend as a result of higher prices and improved operating efficiencies and cost control, but margins remain under pressure from rising input costs. Our key challenge remains to restore Sappi Fine Paper Europe to acceptable profitability. We have achieved limited coated fine paper price increases in parts of Europe which have been insufficient to recover the increasing input costs.

Pulp prices have continued to increase with NBSK increasing to an average of US\$880 per ton from an average of US\$840 per ton in the previous quarter. As the group sells slightly more pulp than it purchases, the increase in pulp prices is beneficial for the group; however, our European business is a large net buyer of pulp and its margins are therefore squeezed by high pulp prices.

Our sales increased 11.8% compared to a year ago to US\$1,473 million in the quarter, largely as a result of price increases and the strengthening of the Euro against the Dollar.

Operating profit was US\$221 million, 89% higher than a year ago.

Net finance costs for the quarter were US\$27 million compared to US\$33 million a year ago. The change reflects the benefit of lower interest rates under certain fixed to floating interest rate swaps implemented in 2002.

Taxation for the quarter of US\$39 million represents an effective tax rate of 20% for the quarter after the favourable effect of the reduction in the South African tax rate from 29% to 28% during the quarter.

Basic EPS was 68 US cents for the quarter compared to 25 US cents a year ago.

Cash flow

Cash generated by operations was US\$176 million for the quarter compared to US\$157 million a year ago. The increase was a result of improved operating performance and a reclassification of US\$31 million, included in Other Non-Cash Items in the quarter ended December 2007, to Net Finance costs paid in the current quarter. This was partly offset by post employment benefit payments of US\$39 million which was US\$21 million higher than the equivalent quarter last year. Post employment payments are expected to be US\$84 million for the full year compared to US\$101 million in the previous year, and to decline further in 2009.

Working capital increased US\$30 million during the quarter primarily as a result of increased receivables which in turn was the result of increased sales and the strength of the Euro against the Dollar.

Capital expenditure on property, plant and equipment was US\$165 million, of which US\$75 million related to the purchase of previously leased equipment and US\$65 million to the Saiccor expansion project. During the next quarter a similar amount will be spent on the Saiccor project.

The performance of the fine paper business improved further in the quarter with improved margins in North America and South Africa. In these markets price improvements have helped us offset continued input cost pressure. In Europe average price improvements have been marginal and not sufficient to offset these input cost increases and restore margins to acceptable levels.

The speciality paper businesses in Europe and North America performed strongly in the quarter.

Sales volumes improved by 5% compared to a year ago and average prices realised in Dollar terms increased approximately 9%, partly as a result of currency movements.

Although prices of coated fine paper in Euro terms have edged up marginally in some markets compared to the prior quarter, they remain below the levels of a year ago. The weakening of the US Dollar and British Pound relative to the Euro reduced price realisation in Euro terms.

Our sales volume increased 5% compared to a year ago. Sales value in US Dollars increased 16.8% largely as a result of volume increases and the impact of the weakening of the Dollar against the Euro. For the half year sales volume increased approximately 2%.

Industry shipments increased 2% for coated fine paper compared to a year ago.

Demand for our products remained firm and industry order books were strong.

We continue to manage our costs, offsetting the continued input cost pressures to a large extent; however, profitability is unlikely to be restored to acceptable levels without material increases in prices.

Our North American business has shown a steadily improving profit trend as a result of improvements across all disciplines. Demand for coated fine paper in reel form remains strong and prices continue to improve; however, in sheet form the markets continue to be negatively influenced by low priced imports. Strong pulp prices contributed to the improved performance because the North American business is a net seller of pulp.

Our sales volume increased 7% for the quarter and sales in US Dollars increased 14%, compared to a year ago.

We continue to reduce our raw material and energy consumption; however, pressure on the prices of our major inputs more than offset these improvements during the quarter.

The business performance in the quarter was supported by good demand, improving pulp and paper prices and the weaker Rand. Inflationary pressure, particularly wood, energy and labour costs, however, remain a concern.

Results were also unfavourably impacted by reduced production and sales volumes as a result of some production problems at Saiccor and by the power disruptions early in the quarter. After a major 3-4 day disruption we reached an agreement with the national utility in terms of which we will meet their requirement to reduce our purchases by generating more of our own power; however, doing so is more costly. Since then we have operated without, and do not foresee, major disruptions.

Production at the Kraft mills continued to improve during the quarter.

Included in operating profit for the quarter is a US\$118 million plantation fair value gain mostly as a result of wood price increases.

The Saiccor expansion project is nearing completion with many of the construction areas currently

undergoing commissioning tests. Start-up is expected during June 2008. The expansion includes power generation which after start-up will increase our power self-sufficiency and reduce power purchases.

second quarter

Directors

Eugene van As retired as Chairman of the board and as a non-executive director of Sappi Limited with effect from the conclusion of the Annual General Meeting held on 03 March 2008.

Dr Danie Cronjé was appointed independent non-executive Chairman of the Sappi Limited board effective upon Mr van As' retirement.

Outlook

Global capacity utilisation remains reasonably high with limited new capacity coming on stream within the next year. Prices for coated fine paper continue to strengthen in most regions in US Dollar terms. Improved price realisation in Europe is, however, essential in order to achieve a much needed improvement in margin. Pulp prices remain high supported by strong demand, particularly from Asia, and the weaker US Dollar.

While market conditions in terms of demand are generally favourable in our industry, we cannot ignore the potential impact of economic slow-downs in North America and Europe on our business.

Operating performance of our southern African operations is expected to remain strong and in North America we expect the improving trend to continue on a year on year basis. Europe's performance will remain under pressure as a result of the pricing situation and high input costs. Manufacturing and logistics efficiencies and tight control over costs remain essential to manage the effect of high energy, pulp and wood costs and labour cost inflation.

Improved cash generation, continued attention to working capital and capital expenditure management will remain priorities.

Operating profit excluding the impact of the plantation fair value adjustment is expected to improve in the next quarter compared to a year ago.

forward-looking statements

Certain statements in this release that are neither reported financial results nor other historical information, are forward-looking statements, including but not limited to statements that are predictions of or indicate future earnings, savings, synergies, events, trends, plans or objectives. Undue reliance should not be placed on such statements because, by their nature, they are subject to known and unknown risks and uncertainties and can be affected by other factors, that could cause actual results and company plans and objectives to differ materially from those expressed or implied in the forward-looking statements (or from past results). Such risks, uncertainties and factors include, but are not limited to the highly cyclical nature of the pulp and paper industry (and the factors that contribute to such cyclical nature, such as levels of demand, production capacity, production, input costs including raw material, energy and employee costs, and pricing), adverse changes in the markets for the group's products, consequences of substantial leverage, including as a result of adverse changes in credit markets that affect our ability to raise capital when needed, changing regulatory requirements, unanticipated production disruptions (including as a result of planned or unexpected power outages), economic and political conditions in international markets, the impact of investments, acquisitions and dispositions (including related financing), any delays, unexpected costs or other problems experienced with integrating acquisitions and achieving expected savings and synergies and currency fluctuations. The company undertakes no obligation to publicly update or revise any of these forward-looking statements, whether to reflect new information or future events or circumstances or otherwise.

Notes to the group results

1.

Basis of preparation

The condensed financial statements have been prepared in accordance with International Accounting Standard 34 Interim Financial Reporting. The accounting policies and methods of computation used in the preparation of the results are consistent, in all material respects, with those used in the annual financial statements for September 2007 which are compliant with International Financial Reporting Standards (IFRS) as issued by the International Accounting

Standards Board.

The results are unaudited.

Comparative figures – Cash outflows relating to contributions to post employment benefit funds previously reflected in cash utilised in investing activities, have been included in cash generated from operations.

Other contingent liabilities *

7

26

60

69

* The decrease in contingent liabilities reflects management's revised estimate of losses which could arise from taxation

queries to which certain group companies are subject. These amounts have now been recognised as liabilities.

7.

Material balance sheet movements

Restricted cash

In the quarter ended 31 December 2007, the company classified US\$41 million of cash as specifically restricted to settle certain post retirement medical liabilities, which did not result in any movement of cash and cash equivalents for cash flow statement purposes. In the current quarter, certain agreements were finalized which now permit the group to direct the use of this cash. Therefore, management now considers this cash to be unrestricted.

Current and non-current interest bearing borrowings

The movement on these balances between September 2007 and March 2008 is largely due to (i) US\$146 million of expenditure on the Saiccor expansion project, (ii) financing for the purchase of leased equipment for US\$75 million and (iii) US\$137 million of currency movements and fair value adjustments.

Taxation

The movement is a result of certain tax liabilities which the group has settled in the past six months.

In connection with the U.S. Securities Exchange Commission (“SEC”) rules relating to “Conditions for Use of Non-GAAP Financial Measures”, we have reconciled EBITDA to net profit rather than operating profit. As a result our definition retains non-trading profit/loss and minority interest as part of EBITDA. EBITDA represents earnings before interest (net finance costs), taxation, depreciation and amortisation. Net finance costs includes: gross interest paid; interest received; interest capitalised; net foreign exchange gains; and net fair value adjustments on interest rate financial instruments. See the Group income statement for an explanation of the computation of net finance costs. We use EBITDA as an internal measure of performance to benchmark and compare performance, both between our own operations and as against other companies. EBITDA is a measure used by the group, together with measures of performance under IFRS to compare the relative performance of operations in planning, budgeting and reviewing the performances of various businesses. We believe EBITDA is a useful and commonly used measure of financial performance in addition to net profit, operating profit and other profitability measures under IFRS because it facilitates operating performance comparisons from period to period and company to company. By eliminating potential differences in results of operations between periods or companies caused by factors such as depreciation and amortisation methods, historic cost and age of assets, financing and capital structures and taxation positions or regimes, we believe EBITDA can provide a useful additional basis for comparing the current performance of the underlying operations being evaluated. For these reasons, we believe EBITDA and similar measures are regularly used by the investment community as a means of comparison of companies in our industry. Different companies and analysts may calculate EBITDA differently, so making comparisons among companies on this basis should be done very carefully. EBITDA is not a measure of performance under IFRS and should not be considered in isolation or construed as a substitute for operating profit or net profit as an indicator of the company’s operations in accordance with IFRS.
